ENDANGERED SPECIES EXPENDITURES FISCAL YEAR 2014

PURPOSE

The Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) (Act) was reauthorized and amended on October 7, 1988, under Public Law 100-478. A new section 18 was added to the Act that requires the U.S. Fish and Wildlife Service (Service) on behalf of the Secretary of the Interior to report annually on certain expenditures on a species-by-species basis. The section reads:

SEC. 18. On or before January 15, 1990, and each January 15 thereafter, the Secretary of the Interior, acting through the Fish and Wildlife Service, shall submit to the Congress an annual report covering the preceding fiscal year which shall contain

(1) the accounting on a species-by-species basis of all reasonably identifiable Federal expenditures made primarily for the conservation of endangered or threatened species pursuant to this Act; and

(2) an accounting on a species-by-species basis of all reasonably identifiable expenditures made primarily for the conservation of endangered or threatened species pursuant to this Act by States receiving grants under section 6.

This document constitutes the 25th report by the Service pursuant to the requirements of section 18 of the Act. The report covers fiscal year (FY) 2014 (October 1, 2013 - September 30, 2014), although some States may be reporting for a different fiscal year period (without duplicating a previous year's reported data). To assist Federal and State agencies with more accurate accounting of expenditures, a multi-species reporting category was added to the FY 2012 and subsequent reports. This option gives agencies another way to report expenditures when it is not possible to determine individual species costs for those species that are part of a multi-species conservation activity.

The term "State" as used in this report is defined in section 3(17) of the Act to mean any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

The term "State agency" as used in this report is defined in section 3(18) of the Act to mean any State agency, department, board, commission, or other governmental entity which is responsible for the management and conservation of fish, plant, or wildlife resources within a State.

The term "conservation," as defined in section 3(3) of the Act, means the use of all methods and procedures necessary to bring any endangered or threatened species to the point where the measures provided for by the Act are no longer necessary--including, but not limited to, research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation. For the purposes of this report, the definition of conservation is further expanded to include any and all actions taken by Federal and State agencies on behalf of threatened or endangered species listed pursuant to the Act.

BACKGROUND

At the time the reporting requirement was enacted by Congress, the Service determined that a good faith effort was expected to develop methods to track and obtain data that are "reasonably identifiable." No extensive or extraordinary measures to develop exceptionally precise data were sought, nor were the reporting agencies expected to prorate staff salaries and other normal operational and maintenance costs not directed toward a particular species. The expenditures reported in this and the preceding reports do not necessarily constitute all expenditures made for each species.

This report represents a compilation of reasonably identifiable expenditures for the conservation of listed species reported independently by Federal and State agencies. Expenditures for FY 2014 are reported for 1,474 domestic threatened and endangered species of the 1,523 domestic species that were listed under United States jurisdiction in 50 CFR Part 17 during FY 2014 up through September 30, 2014 (Tables 1 and 3).

Expenditures are identified by listed entity, which may be a species¹, subspecies², Distinct Population Segment (DPS)³, or Evolutionarily Significant Unit (ESU)⁴, as identified in the Act's implementing regulations at 50 CFR 17.11 and 17.12.

These expenditures are reported separately for the Service and in aggregate for all other Federal agencies and the States (Tables 1 and 3).

For these annual reports, the Service requests that all reporting agencies submit their data directly into our Web-based data entry system to ensure accuracy, consistency, and efficiency. At the time of submission, the reporting agencies certify that their information is accurate. The information provided in this report, pursuant to section 18 of the Endangered Species Act, is presented as it was submitted by these agencies. We do not verify an agency's data after the data are submitted to us. In order to improve the Service's efficiency in producing future editions of this report, the Service will no longer enter a reporting agency's expenditures data into our Web-based system. All agencies must enter their own expenditures data into our Web-based system.

Expenditures for candidate species or other species not listed in 50 CFR Part 17 as of the end of each fiscal year are not included in this report. In addition, other types of expenses, such as those for litigation, are not reported.

SECTION 18(1), FEDERAL EXPENDITURES

Expenditures Reported by the Fish and Wildlife Service

The Service's operational categories of expenditures include fisheries, refuges, land acquisition, law enforcement, research, international conservation, and regional and field office operations for listing, recovery, consultation, migratory birds, and grants. All reasonably identifiable expenditures that could be attributed to individual species within these activities have been included.

The Federal assistance portion under section 6 of the Act for each species is included in the FWS Total in Table 1. The State share for each species for which a Federal contribution was made is included in the States Total column of Table 1.

A portion of the Service's funds for consultation, listing, and recovery are incorporated into salaries, operations, and maintenance costs. If these costs contributed to the conservation of listed species and are reasonably identifiable to specific species, they are included in this report.

Expenditures Reported by other Federal Agencies

The Director of the Service sends a request to other Federal agencies identified as likely to have species-specific expenditures under the Act to report for each fiscal year. The Service provides guidance identifying what constitutes reasonably identifiable expenditures and how these are to be reported (Appendix A). For FY 2014, the Service and 29 other Federal agencies identified expenditures for the conservation of individual threatened and endangered species. Results from all responding Federal agencies are included in Appendix B. The data identified by those responding Federal agencies for individual species and multi-species conservation activities are tabulated in the "Other Fed" columns of this report (Tables 1 and 3).

¹ **Species** For purposes of the ESA, this term includes any species or subspecies of fish or wildlife or plants, and any Distinct Population Segment of any species of vertebrate fish or wildlife that interbreeds when mature.

² **Subspecies** A taxonomic rank below that of species, usually recognizing individuals that have certain heritable characteristics distinct from other subspecies of a species.

³ **Distinct Population Segment** A subdivision of a vertebrate species that is treated as a species for purposes of listing under the Endangered Species Act.

⁴ **Evolutionarily Significant Unit** A Pacific salmonid stock that is substantially reproductively isolated from other stocks of the same species and which represents an important part of the evolutionary legacy of the species; functionally equivalent to DPS for the purpose of listing under ESA.

SECTION 18(2), STATE EXPENDITURES

The assistance of the Association of Fish and Wildlife Agencies is sought by the Service to help coordinate the reporting of reasonably identifiable expenditures made by the States. States report their data by species directly to the Service via our Web-based system. Collective results from all responding State agencies are included in Appendix C. For FY 2014, 29 State agencies identified expenditures for the conservation of individual threatened and endangered species.

SUMMARY OF DATA

Table 1 reports the activity-related expenditures that are reasonably identifiable to specific individual species as well as multi-species activity costs by the Service, other Federal agencies collectively, and the States collectively. Expenditures for land acquisition (Table 3) are not included in this tabulation. Species are grouped in the same general order as they appear in 50 CFR Part 17. Table 1 also provides the rank for each species from Table 2.

Table 2 ranks each species in descending order of the species total from Table 1. A cumulative total of the activity-related, species-specific expenditures is also provided.

Table 3 displays land acquisition expenditures, reasonably identifiable to specific individual species, by the Service, other Federal agencies collectively, and the States collectively. Expenditures for land purchased for multi-species conservation activities are listed at the end of the table. Table 3 also provides the rank for land expenditures by species.

Table 4 shows the combined total expenditures for species and land acquisition by reporting Federal agency, the Service, and the States collectively. Expenditures for foreign species and multi-species conservation activities are included.

Total expenditures reported for domestic and foreign species in **FY 2014** were **\$ 1,437,810,654**, of which **\$ 1,368,502,501** were reported by Federal agencies and **\$ 69,308,153** were reported by the States (Table 4).

COMPARISON TO PREVIOUS REPORTS

Over the years, these reports have been refined as our experience in planning and coordinating with the reporting agencies to track such expenditures has improved. A good faith effort is made to develop species-by-species expenditures for these reports, but due to differences in reporting methods, this report cannot be easily compared to prior expenditures reports. These year-to-year differences include changes in the number of Federal and State agencies reporting data, changes in how expenditures are calculated, changes in the agencies' abilities to track expenditures, and changes in the number of listed species. Therefore, real dollar increases or decreases cannot accurately be calculated or inferred from the overall or individual totals.

TABLE 1. FY 2014 REPORTED EXPENDITURES FOR ENDANGERED AND THREATENED SPECIES

The list of species in Table 1 essentially follows the taxonomic and nomenclatural conventions used in 50 CFR Part 17 for the identification and sequence of species' names. For ease of reference, the alphabetized, inverted common name is provided within each group (usually Class) of animals and plants. Thus, the gray bat is found with other bats under "Bat, gray" within mammals, and Tar River spiny mussel is found under "Spiny mussel, Tar River" within the clams. Groups of animals follow the sequence: Mammals, Birds, Reptiles, Amphibians, Fishes, and Invertebrates, which include Clams, Snails, Insects, Arachnids, and Crustaceans. Groups of plants follow the sequence: Flowering Plants, Conifers and Cycads, Ferns and Allies, and Lichens.

For additional information about the names, historical range, or status of an endangered or threatened species, the species can be found in the Code of Federal Regulations at [50 CFR 17.11 \(list of wildlife\)](#) or [17.12 \(list of plants\)](#), or through our Web site at <http://www.fws.gov/angered>. The STATUS column indicates whether the species is endangered (E), threatened (T), experimental (EXPN), or threatened by similarity of appearance (SAT).

Fish and Wildlife Service expenditures (FWS Total) and other Federal agency expenditures (Other Fed) are totaled in the "Federal Total" column. The States Total is the amount reported to the Service directly by the States. None of these reported totals includes costs for land acquisition. (See Table 3 for reported land acquisition expenditures.)

The RANK is from Table 2 and indicates each species' rank by identifiable expenditures, where #1 is the highest expenditure.

Multi-species conservation activity-related expenditures are tabulated at the end of Table 1.

TABLE 1. REPORTED EXPENDITURES FOR FY 2014 FOR ENDANGERED AND THREATENED SPECIES, NOT INCLUDING LAND ACQUISITION COSTS

Group Name	Rank	Species (50 CFR Part 17)	Status	FWS Total	Other Fed	Federal Total	States Total	Species Total

TABLE 2. SPECIES RANKED IN DESCENDING ORDER OF TOTAL FY 2014 REPORTED EXPENDITURES

Species are arranged in descending rank order of total identifiable expenditures (Table 1). Cumulative totals of the expenditures totals are provided. The cumulative total column is the sum of all higher ranked species totals (from Table 1) and the selected species entry. This table does not include costs for land acquisition or multi-species conservation activities.

The species list in the report follows the same breakdown as in 50 CFR 17.11 and 17.12. All populations are itemized separately, not just Evolutionarily Significant Units (ESUs). Thus, it appears as if there are more listed species. Separate populations of the same species may be ranked differently.

TABLE 2. SPECIES RANKED IN DESCENDING ORDER OF TOTAL FY 2014 REPORTED EXPENDITURES, NOT INCLUDING LAND ACQUISITION COSTS

Rank	Species (50 CFR Part 17)	Status	Species Total	Cumulative Total
1	Sturgeon, pallid (<i>Scaphirhynchus albus</i>) - Entire	E	\$68,778,575	\$68,778,575
2	Steelhead (<i>Oncorhynchus</i> (=Salmo) <i>mykiss</i>) - Snake River Basin DPS	T	\$52,178,312	\$120,956,887
3	Salmon, Chinook (<i>Oncorhynchus</i> (=Salmo) <i>tshawytscha</i>) - Snake River spring/summer-run ESU	T	\$49,199,036	\$170,155,923
4	Steelhead (<i>Oncorhynchus</i> (=Salmo) <i>mykiss</i>) - Middle Columbia River DPS	T	\$48,512,887	\$218,668,810
5	Salmon, Chinook (<i>Oncorhynchus</i> (=Salmo) <i>tshawytscha</i>) - Lower Columbia River ESU	T	\$42,525,708	\$261,194,518
6	Salmon, Chinook (<i>Oncorhynchus</i> (=Salmo) <i>tshawytscha</i>) - Snake River fall-run ESU	T	\$35,442,077	\$296,636,595
7	Trout, bull (<i>Salvelinus confluentus</i>) - U.S.A., conterminous, lower 48 states	T	\$35,194,738	\$331,831,333
8	Salmon, Chinook (<i>Oncorhynchus</i> (=Salmo) <i>tshawytscha</i>) - Upper Columbia spring-run ESU	E	\$33,836,557	\$365,667,890

TABLE 3. FY 2014 REPORTED LAND ACQUISITION EXPENDITURES FOR ENDANGERED AND THREATENED SPECIES

Species are arranged in the same sequence as Table 1. These costs are not included in the expenditures displayed in Tables 1 and 2. Only those species that had land acquisition costs reported for FY 2014 are included here. Land rank is included to show the relative order of the species for which land expenditures are reported. Land acquisition costs for multi-species conservation activities are tabulated at the end of Table 3.

**TABLE 3. REPORTED LAND ACQUISITION EXPENDITURES FOR FY 2014 FOR
ENDANGERED AND THREATENED SPECIES**

Group Name	Rank	Species (50 CFR Part 17)	Status	FWS Total	Other Fed	Federal Total	States Total	Species Total
Mammals	8	Bat, Indiana (<i>Myotis sodalis</i>) - Entire	E	\$1,223,238	\$2,935,700	\$4,158,938	\$0	\$4,158,938

TABLE 4. FY 2014 EXPENDITURES REPORTED BY INDIVIDUAL FEDERAL AGENCIES AND THE STATES

This table displays combined species expenditures and land acquisition costs by each reporting Federal agency, the Service, and the States collectively. Expenditures for foreign species are included, as well as costs for multi-species conservation activities.

Table 4. FY2014 Expenditures Reported by Individual Federal Agencies and the States.

Appendix A. Supplemental Guidance for Reporting Expenditures for the Conservation of Endangered and Threatened Species -- FY 2014

This reporting guidance provides information on how to report expenditures attributable to individual species to the extent this information is reasonably available. The Congress requested information for this report on a species-by-species basis, but to provide the most accurate account of expenditures for the conservation of species listed under the Endangered Species Act, we added a new reporting feature in FY 2012. This new “multi-species” option will allow the reporting of lump sum costs for multi-species conservation activities **when it is not possible to account accurately for individual species.**

Each agency must enter data directly into our Web-based system and will need to designate a contact person (more than one person is permissible) to enter the data. The contact person(s) will need to obtain a username and password before entering the data. Credentials can be obtained by accessing our Environmental Conservation Online System (ECOS) home page at <http://ecos.fws.gov/> and clicking on “Contact Us” located at the bottom of the ECOS home page. This brings you the Help Desk where you will click on “help desk web form.”

Please allow 2 working days for access approval (an email confirmation will be sent to you). Once you receive your log-in credentials and access approval email, log in at <https://ecos.fws.gov> to begin entering expenditures data. Contact the ECOS Help Desk (970-226-9468) if you experience any problems.

The following information should be used to gather the data.

BACKGROUND

- Section 18 of the Endangered Species Act of 1973 (16 U.S. 1531 *et seq.*) reads, in part, "...the Fish and Wildlife Service, shall submit to the Congress an annual report covering the preceding fiscal year which shall contain--
 - (1) an accounting on a species-by-species basis of all reasonably identifiable Federal expenditures made primarily for the conservation of endangered and threatened species pursuant to this Act; and
 - (2) an accounting on a species-by-species basis for all reasonably identifiable expenditures made primarily for the conservation of endangered and threatened species pursuant to this Act by States receiving grants under section 6."
- The conference report for the 1988 amendments made some of the following points concerning section 18 of the Act:
 - Provision should not become unduly burdensome or result in diversion of funds from the operation of the program.
 - The Secretary of the Interior is to make a good faith effort to develop and obtain data but is not to undertake extensive or extraordinary measures.
 - Generalized dollar estimates will suffice.
 - Amendment does not apply to expenditures for delisted, proposed, and candidate species.
 - Amendment is not to require new species-specific time sheets for the Service or other reporting agency.

- Listing, consultation, and law enforcement are to be included to the extent they are "reasonably identifiable."
- Only salary costs that can be reasonably identified as applicable to listed species need be reported.
- For other Federal and State agencies, a good faith effort to collect information is expected.
- Submission of data from any agency is not to be a precondition to receiving any contracts or grants or establishing other arrangements with the Fish and Wildlife Service.
- Only one data set per agency should be submitted for any given fiscal year.

DATA FORMAT

- Species should be identified by the same scientific name as found in the most current list of endangered and threatened species.
- Amounts should be reported in whole dollars. Amounts above \$2,000 may be rounded to the nearest \$500 or \$1,000; smaller amounts may be rounded to the nearest \$100. **Do not report amounts lower than \$100.**

EXPENDITURES TO BE REPORTED

- Only species on the Federal list of Endangered and Threatened Wildlife and Plants (50 CFR Part 17) at the end of Federal fiscal year 2014 (October 1, 2013 to September 30, 2014) are to be reported. Expenditures made prior to the actual listing date of a species, but still within the same year, may be reported (e.g., costs of public meetings, notices, surveys, initial recovery efforts). Funds expended for unlisted, separate populations of listed vertebrates cannot be included in the report (e.g., Atlantic coast least terns, Alaska gray wolves). Expenditures for State-listed species are not reportable unless they are also federally listed. Amounts for foreign species on the list (e.g., grants or contracts carried out in another country) are reportable in the same manner as domestic species, but again, to the extent they are reasonably identifiable.
- Only reasonably identifiable expenditures for listed species will be compiled for this report. Extraordinary accounting to track funds expended on listed species is not expected. **Funds reported should be those actually expended, not obligated.**
- Examples of reportable expenditures include status surveys, habitat management, habitat acquisition, research, propagation (including surrogate species), recovery plan development or implementation, and mitigation. **Projects must primarily benefit listed species** and not other conservation goals, although if a readily identifiable portion of the expenditure is for the benefit of listed species (either individually or collectively), that portion of the expenditure may be reported.
- All habitat (land or water) acquisition costs are to be reported separately from all other identifiable expenditures. Such acquisitions must be primarily for the purpose of conserving federally listed species. As with other projects, those portions of habitat acquisition costs that are specifically for a listed species may be prorated out of the total acquisition costs when the other

habitat is being acquired for other purposes (e.g., 25 acres of a 250-acre purchase will be set aside).

- Expenditures in a single project devoted to a number of listed species should be prorated by species, if possible. **When it is not possible to determine individual listed species costs in a multi-species project by prorating, those costs should be entered, in total, in the multi-species category option. The comment box, which is part of this feature, should be used to include information about the project.**
- General surveys or projects that cover a large number of species, some of which may not be listed, are reportable only to extent that the agency can reasonably identify the portion of costs that benefit listed species.
- Expenditures associated with consultations pursuant to section 7 of the Act should be reported as for the benefit of a specific species to the extent they are readily identifiable to that particular species. Thus, a formal consultation dealing with a single species, or up to several species where the relative costs are easily divisible, should be reported under that or those species. **Consultation costs not readily attributable to individual species can be reported in the multi-species category.**
- Monitoring and survey costs should be reported when: (1) the cost of the monitoring or survey was incurred during the period the species was under a proposed listing and the species was actually listed in the same fiscal year that the monitoring and surveys were conducted; (2) the monitoring or survey covered both candidates and listed species, and the costs can be prorated to include only the listed species; or (3) the cost was readily identifiable to individual species. **Costs meeting the criteria in (1) and (2), but not readily identifiable to individual species can be reported in the multi-species category.**
- Salary and benefits of an employee working full-time on a single species or whose time is devoted to particular species that can be readily identified should be reported for those species. Travel costs should be treated similarly. **Staff costs for work on multi-species activities that cannot be identified to particular species can be reported in the multi-species category.**
- Any State or Federal project that incurs increased costs related directly to mitigation or other conservation efforts on behalf of federally listed species should report that added cost, by species, if readily identifiable, or **may report such costs in the multi-species category.**
- All State agencies (e.g., fish and wildlife, parks, heritage programs, forests, highways) should report their expenditures, but only a single, collective report from each State should be submitted. **Expenditures should include conservation costs for fish, wildlife, and plants.** For ESA section 6 grants or other Federal grants, States should report **only the State cost-share portion** of each grant. States should not include other sources of non-Federal cost share, e.g., third-party contributions, unless those contributions are donated to the State as a general donation.
- For reimbursable funds, the paying or disbursing agency should report the expenditure.
- **Litigation costs should not be reported.**

Appendix B. Reports Provided by Other Federal Agencies for Fiscal Year 2014

Department of Agriculture:

- Animal and Plant Health Inspection Service
- Farm Service Agency*
- Forest Service
- Natural Resources Conservation Service

Department of Commerce:

- National Oceanic and Atmospheric Administration

Department of Defense:

- Office of the Under Secretary
(representing Air Force, Army, Defense Logistics Agency*, Marine Corps and Navy)
- Army Corps of Engineers

Department of Energy:

- Bonneville Power Administration
- Southeastern Power Administration*
- Southwestern Power Administration
- Western Area Power Administration

Department of Homeland Security

- Coast Guard
- Customs and Border Protection
- Federal Emergency Management Agency
- Office of Science and Technology

Department of the Interior:

- Bureau of Indian Affairs
- Bureau of Land Management
- Bureau of Ocean Energy Management *
- Bureau of Reclamation
- National Park Service
- Office of Surface Mining
- U.S. Geological Survey

Department of Transportation:

- Federal Aviation Administration
- Federal Highway Administration

Independent Agencies:

- Environmental Protection Agency
- Federal Communications Commission*
- Federal Energy Regulatory Commission
- Nuclear Regulatory Commission
- Smithsonian Institution
- Tennessee Valley Authority

* Agencies reporting no expenditures for FY 2014

Appendix C. Expenditures Reported by the States for Fiscal Year 2014

The following States reported expenditures for FY 2014:

Alabama
Alaska
Arizona
Arkansas
Colorado
Florida
Illinois
Indiana
Iowa
Kentucky
Louisiana
Massachusetts
Minnesota
Montana
Nebraska
Nevada
New Jersey
North Carolina
North Dakota
Oklahoma
Oregon
Pennsylvania
South Dakota
Utah
Vermont
Virginia
Washington
West Virginia
Wyoming

Appendix C. Expenditures Reported by the States for FY2014

Group Name	Common Name	Scientific Name	General Expenditures	Land Expenditures
Mammals	bat, Florida bonneted	Eumops floridanus	\$57,476	\$0
	Bat, gray -- Entire	Myotis grisescens	\$103,125	\$0
	Bat, Indiana -- Entire	Myotis sodalis	\$296,548	\$0
	Bat, lesser long-nosed -- Entire	Leptonycteris curasoae yerbabuena	\$26,500	\$0
	Bat, Ozark big-eared -- Entire	Corynorhinus (=Plecotus) townsendii ingens	\$12,500	\$0
	Bat, Virginia big-eared -- Entire	Corynorhinus (=Plecotus) townsendii virginianus	\$157,716	\$0
	Bear, grizzly -- lower 48 States, except where listed as an experimental population or delisted	Ursus arctos horribilis	\$1,765,806	\$741,254
	Bear, grizzly -- U.S.A. (portions of ID and MT, see 17.84(l))	Ursus arctos horribilis	\$457,000	\$0
	Bear, grizzly -- Selkirk Recovery Zone Population	Ursus arctos horribilis	\$3,300	\$0
	Bear, Louisiana black -- Entire	Ursus americanus luteolus	\$150,679	\$0
	Bear, polar -- Entire	Ursus maritimus	\$78,500	\$0
	Caribou, woodland -- Selkirk Mountain population	Rangifer tarandus caribou	\$18,100	\$0

Group Name	Common Name	Scientific Name	General Expenditures	Land Expenditures
	Deer, Columbian white-tailed -- Columbia River DPS	<i>Odocoileus virginianus leucurus</i>	\$18,100	\$0
	Ferret, black-footed -- entire population, except where EXPN	<i>Mustela nigripes</i>	\$105,472	\$0
	Ferret, black-footed -- U.S.A. (specific portions of AZ, CO, MT, SD, UT, and WY)	<i>Mustela nigripes</i>	\$270,745	\$0
