## Construction Site Stormwater Runoff Control

Uncontrolled stormwater runoff from construction sites can significantly impact rivers, lakes and estuaries. Sediment in waterbodies from construction sites can reduce the amount of sunlight reaching aquatic plants, clog fish gills, smother aquatic habitat and spawning areas, and impede navigation.

Phase II MS4s are required to develop a program to reduce pollutants in stormwater runoff to the MS4 for construction sites disturbing one or more acres. This primarily includes developing:

- An ordinance,
- Requirements to implement erosion and sediment control BMPs,
- Requirements to control other waste at the construction site,
- Procedures for reviewing construction site plans,
- Procedures to receive and consider information submitted by the public, and
- Procedures for inspections and enforcement of stormwater requirements at construction sites.

In addition to the stormwater requirements that Phase II MS4s place on construction sites, construction operators must also apply for NPDES permit coverage if their project disturbs at least one acre and discharges to a waterbody. A description of these requirements is available at [EPA's stormwater construction website](#).

Additional information on this minimum measure, including the stormwater Phase II [regulatory requirements](#) for construction site runoff control and a [fact sheet on the construction minimum measure](#) [PDF - 245 KB - 4 pp], is also available.

Key BMPs and Resources:

MS4s addressing the construction minimum measure should focus on the following four key BMPs to help them in developing a stormwater construction program. The additional BMPs in the next section below will help construction operators comply with the MS4's requirements.

- [Local Ordinances for Construction Site Runoff Control](#) BMP fact sheet
- [Construction Phase Plan Review](#) BMP fact sheet
- [Contractor Training and Certification](#) BMP fact sheet
- [Municipal Construction Inspection Program](#) BMP fact sheet
- [Construction Industry Compliance Assistance website](#) [EXIT Disclaimer](#) provides plain language information on environmental rules, including stormwater, for the construction industry.

Poorly maintained BMPs can result in significant quantities of sediment being discharged to storm drains.

## BMPs:

### Municipal Program Oversight

#### EPA Internet Resources:

- [Construction Industry Compliance Assistance Web Site](#) EXIT Disclaimer provides plain language information on environmental rules, including stormwater, for the construction industry.
- [Urban Management Measures Guidance](#) Chapter 5 focuses on construction site erosion, sediment, and chemical control.
- [Stormwater Pollution Prevention Plans for Construction Activities](#) describes the steps necessary to develop a stormwater pollution prevention plan for construction activity.
- [Model Ordinances](#) including erosion and sediment control ordinances, are available from EPA's Nonpoint Source Program.
- [Stormwater case studies on municipal construction programs](#) includes case studies of how a Phase I or Phase II community has implemented the construction requirements.
- [Stormwater outreach materials for the construction industry](#) including brochures in English and Spanish, and a poster are available for download.

#### Other Internet Resources:

- [Minnesota Pollution Control Agency](#) EXIT Disclaimer stormwater guidance:
  - [Stormwater Construction Inspection Guide](#) [PDF - 5.77 MB - 35 pp] EXIT Disclaimer describes how municipal inspectors should conduct construction site inspections.
  - [Stormwater Compliance Assistance Tool Kit for Small Construction Operators](#) [PDF - 500 KB - 44 pp] EXIT Disclaimer provides guidance to help small construction operators comply with their stormwater requirements.
- Kentucky Erosion Prevention and Sediment Control Field Guide is available for download in three parts from the [Kentucky Division of Water's Stormwater website](#) EXIT Disclaimer.
- [2005 Stormwater Management Manual for Western Washington: Volume II -- Construction Stormwater Pollution Prevention](#) EXIT Disclaimer describes 12 elements of construction SWPPPs and BMP standards and specifications.
