

# Community-Based Resource Guide

## Federal Interagency Working Group on Environmental Justice

### U.S. Department of the Interior

In order for community leaders, community-based organizations, indigenous organizations, and grassroots stakeholders to better address environmental justice issues, the Federal Interagency Working Group on Environmental Justice (IWG) created this Resource Guide. This document serves as a guide to provide information on financial and technical resources that are directly applicable to community-based organizations. Community leaders and individuals will have the opportunity to research and review multiple community capacity-building programs, as the Resource Guide lists eligibility, availability, and limitations for each assistance program. The goal of the Resource Guide is to provide communities with easily accessible information on the federal resources that can help create healthy, sustainable communities.

**Bureau of Indian Affairs Mission:** Enhance the quality of life, to promote economic opportunity, and to carry out the responsibility to protect and improve the trust assets of American Indians, Indian tribes, and Alaska Natives."

**Bureau of Land Management Mission:** The Bureau of Land Management is responsible for stewardship of our public lands. The BLM is committed to manage, protect and improve these lands in a manner to serve the needs of the American people. Management is based upon the principles of multiple use and sustained yield of our nation's resources within a framework of environmental responsibility and scientific technology. These resources include recreation, rangelands, timber, minerals, watershed, fish and wildlife habitat, wilderness, air and scenic quality, as well as scientific and cultural values.

**Bureau of Ocean Energy Management, Regulation and Enforcement:** The bureau's mission is to manage the ocean energy and mineral resources on the Outer Continental Shelf and Federal and American Indian mineral revenues to enhance public and trust benefits, promote responsible use, and realize fair value.

**Bureau of Reclamation:** The mission of the Bureau of Reclamation is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public.

**Fish and Wildlife Service Mission:** The U.S. Fish and Wildlife Service's mission is, working with others, to conserve, protect and enhance fish, wildlife, and plants and their habitats for the continuing benefit of the American people.

**Geological Survey Mission:** The mission of the Geological Survey is to provide geologic, topographic, and hydrologic information that contributes to the wise management of the Nation's natural resources and that promotes the health, safety, and well-being of the people. This information consists of maps, data bases, and descriptions and analyses of the water, energy, and mineral resources, land surface, underlying geologic structure, and dynamic processes of the earth.

**National Park Service Mission:** The National Park Service preserves unimpaired the natural and cultural resources and values of the national park system for the enjoyment, education, and inspiration of this and future generations. The Park Service cooperates with

partners to extend the benefits of natural and cultural resource conservation and outdoor recreation throughout this country and the world.

**Office of Surface Mining:** To Carry out the requirements of the Surface Mining Control and Reclamation Act (SMCRA) in cooperation with States and Tribes.
