INTRODUCTION

Data from Census 2000 are presented in three printed report series:

1. PHC-1, *Summary Population and Housing Characteristics*
2. PHC-2, *Summary Social, Economic, and Housing Characteristics*
3. PHC-3, *Population and Housing Unit Counts*

The data from Census 2000 were derived from a limited number of basic questions asked of the entire population and about every housing unit (referred to as the 100-percent questions, found on the “short form”), and from additional questions asked of a sample of the population and housing units (referred to as the sample questions, found on the “long form”).

The PHC-1, *Summary Population and Housing Characteristics*, report series provides data based on the 100-percent questions. The subjects are age, Hispanic or Latino origin, household relationship, race, sex, tenure (owner- or renter-occupied), and vacancy characteristics. Land area measurements and population density also are provided. This series is similar to the 1990 census CPH-1 series.

The PHC-2, *Summary Social, Economic, and Housing Characteristics*, report series provides sample data based on both the 100-percent and the sample questions. Sample subjects include place of birth; residence in 1995; language; educational attainment and school enrollment; veteran status; disability status; employment status; journey to work; work status, earnings, income, and poverty status in 1999; physical housing characteristics; units in structure; fuel and equipment characteristics; owner and renter household characteristics, such as year owner moved into unit; home value; contract and gross rent; and mortgage and rental cost characteristics. This series is similar to the 1990 census CPH-5 series.

The PHC-3, *Population and Housing Unit Counts*, report series provides Census 2000 and historical comparisons of the 100-percent population and housing unit counts. It provides land and water area measurements, and population density. The user notes section documents geographic changes over the past decade. This series is similar to the 1990 census CPH-2 series.

In each series, there is one report for each state, the District of Columbia, and Puerto Rico, plus a United States summary report. Many tables in the United States summary reports include data for Puerto Rico.

HOW TO FIND GEOGRAPHIC AREAS AND SUBJECT MATTER DATA

This report includes a table finding guide to assist the user in locating those statistical tables that contain the desired data. The table finding guide lists alphabetically, by geographic area, the subjects shown in this report. To determine which tables in this report show data for a particular topic, find the subject in the lefthand column of the table finding guide and then look across the columns using the headings at the top for the desired type of geographic area. Figure I-1 is an example of a table finding guide.

The table finding guide does not include cross-classifications of subject-matter items. Additional information to locate data within specific reports is provided in the headnote at the top of the table finding guide and in the footnotes at the bottom of the guide.

HOW TO USE THE STATISTICAL TABLES

Parts of a Statistical Table

The census data included in printed reports are arranged in tables. Each table includes four major parts: (1) heading, (2) boxhead, (3) stub, and (4) data field. A typical census report table is illustrated in Figure I-2.

The heading consists of the table number, title, and headnote. The table number indicates the position of the table within the report, while the title is a brief statement indicating the subjects and time reference of the data presented in the table. The headnote is enclosed in brackets and is located under the title. It contains statements that qualify, explain, or provide information pertaining to the entire table.

The boxhead is under the heading. This portion of the table, which contains the individual column heads or captions, describes the data in each vertical column. In the boxhead of many tables, a spanner appears across and above two or more column heads or across two or more lower spanners. The purpose of a spanner is to classify or qualify items below it or separate the table into identifiable blocks in terms of major aspects of the data.

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

¹State, District of Columbia, or Puerto Rico.

²Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

³County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

The stub is located at the left edge of the table. It includes a listing of line or row captions or descriptions. At the top of the stub is the stubhead. The stubhead is considered to be an extension of the table title and usually shows generic geographic area designations and restrictions.

In the stub, several features are used to help the user better understand the contents of the table. Usually, a block of data lines is preceded by a sidehead. The sidehead, similar to a spanner, describes and classifies the stub entries following it. The use of indentation in a stub indicates the relationship of one data line to another. Indented data lines represent sub-categories that, in most instances, sum to a total. Occasionally

in tables, it is desirable to show one or more single-line subcategories that do not sum to the total.

The data field is that part of the statistical table that contains the data. It extends from the bottom of the boxhead to the bottom of the table and from the right of the stub to the right edge of the page.

Both geographic and subject-matter terms appear in tables. It is important to read the definitions of the terms used in the tables because census terms often are defined in special ways that reflect the manner in which the questions were asked and the data were tabulated. Definitions of geographic terms are provided in PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, Appendix A. Census tables often include derived measures such as medians, means, percentages, and ratios. These and other subject-matter terms are defined in Appendix B of the same report.

Symbols and Geographic Abbreviations

The following symbols are used in the tables and explanations of subjects covered in Census 2000 reports:

- A dash “-” represents zero or a derived measure that rounds to less than 0.1.
- (X) means not applicable. In the 1990 and earlier decennial census reports, three dots “...” meant not applicable.
- (NA) means not available.

-
- The superscript prefix “r” indicates that the count has been revised since the publication of the 1990 census reports, or that the area was erroneously omitted or not shown in the correct geographic relationship in the 1990 census reports. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - A dagger “†” next to the name of a geographic area indicates that there has been a geographic change (for example, an annexation or detachment, a new incorporation, or a name change) since the information was published for the 1990 census for that area. This symbol appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series. The geographic change information for the entities in a state is shown in the “User Notes” section of the Census 2000 PHC-3 report for that state.
 - A plus sign “+” is appended to the lower bound of the highest interval when the median falls in the upper interval of an open-ended distribution. A minus sign “-” is appended to the upper bound of the lowest interval when the median falls in the lowest interval of an open-ended distribution. For more information on medians, see the section on “Derived Measures” in Appendix B.
 - A minus sign “-” preceding a figure denotes decrease. The minus sign appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (U) means the place or place part is composed entirely of urban land area. The (U) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (R) means the place or place part is composed entirely of rural land area. The (R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.
 - (U/R) means the place or place part is composed of both urban land area and rural land area. The (U/R) appears only in the Census 2000 PHC-3, *Population and Housing Unit Counts*, report series.

The following geographic abbreviations and terms may be used in the tables in this report:

- A “(part)” next to the name of a geographic area in a hierarchical presentation indicates that the geographic entity is located only partially in the superior geographic entity. For example, a “(part)” next to a place name in a county subdivision-place hierarchy indicates that the place is located in more than one county subdivision. (Places also may be “split” by county, congressional district, urban/rural, metropolitan area, voting district, and other geographic boundaries, depending on the presentation.) Other geographic entities also can be “split” by a higher level entity. The exception is a tabulation block, which is unique within all geographic entities in census products.
- ANVSA is Alaska Native village statistical area.
- ANRC is Alaska Native Regional Corporation.
- CCD is census county division.
- CDP is census designated place.
- CMSA is consolidated metropolitan statistical area.
- MA is metropolitan area.
- MSA is metropolitan statistical area.
- OTSA is Oklahoma tribal statistical area.
- PMSA is primary metropolitan statistical area.
- SDAISA is state designated American Indian statistical area.
- TDSA is tribal designated statistical area.
- UT is unorganized territory.

GRAPHICS

Charts, statistical maps, and other graphic summaries are included in some Census 2000 reports.

USER NOTES

User notes include corrections, errata, and related explanatory information. This section appears directly before the statistical tables in census reports. It presents information about unique characteristics of the report and changes or corrections made too late to be reflected in the text or tables themselves. However, sometimes this information becomes available too late to be reflected even in the user notes. APPENDIXES

Appendixes A through E, G, and H, described below, are found in the separate printed volume, PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, or on the Internet at <http://www.census.gov/prod/cen2000/phc-3-a.pdf>. Appendix F is included in this report.

Appendix A, Geographic Terms and Concepts. Provides definitions of the types of geographic areas and related information used in census products.

Appendix B, Definitions of Subject Characteristics. Contains definitions for the subject-matter terms used in census products, including explanations of derived measures, limitations of the data, and comparability with previous censuses. The subjects are listed alphabetically. Population characteristics are defined first, followed by the definitions of the housing subjects.

Appendix C, Data Collection and Processing Procedures. Explains the enumeration and residence rules used in counting the population and housing units in the United States and Puerto Rico. It also describes the major components of the operational plan for Census 2000, and includes a glossary of terms.

Appendix D, Questionnaire Facsimile. Presents a facsimile of the Census 2000 questionnaire used to collect the data in this report.

Appendix E, Data Products and User Assistance. Summarizes the Census 2000 data products by describing the information available in printed reports and through electronic media such as CD-ROM, DVD, and the Internet. It also describes Census 2000 maps and other geographic products, reference materials, and sources of assistance.

Appendix F, Maps. Contains maps depicting the geographic areas shown in this report.

Appendix G, Accuracy of the Data. Provides information on confidentiality of the data, imputation of housing unit status and population counts, sources of errors in the data, and editing of unacceptable data.

Appendix H, Acknowledgments. Lists many of the U.S. Census Bureau staff who participated in the various activities of Census 2000.

¹State, District of Columbia, or Puerto Rico.

²Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

³County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

GENERAL NOTES

User Note 1

The user should be aware that there are limitations to many of these data. Please refer to the text provided with this report for further explanation of the limitations of the data. The population and other data shown for Census 2000 in this report is as of April 1, 2000; the boundaries used for all geographic entities are as of January 1, 2000. All boundaries are intended for Census Bureau statistical data collection and presentation only; their depiction and designation for statistical purposes do not constitute a determination of jurisdictional authority or entitlement. Corrections to the Census 2000 data as a result of certified Count Question Review changes are available from the Census Bureau's Internet site at: www.census.gov/prod/cen2000/notes/errata.pdf.

User Note 2

Data comparability for county subdivisions is shown only when the county subdivision contains substantially the same territory as reported for the 1990 census (generally defined as at least 80 percent of the previous territory). There is no comparability provided for county subdivisions that have been extensively revised. Revised entities are noted by and within county. Changes to a geographic entity can be the result of legal change actions, statistical redefinition, correction of previous boundary or drafting errors, or new erroneous information.

Incorporated place and census designated place (CDP) comparability is provided for all places that retained their name or general area without regard to the amount of territorial change between censuses. Place comparability is not shown if the entity is new for Census 2000 (including changes from a CDP to a legally incorporated place and vice versa) or is the result of a merger that created an entirely new entity, or if a Census 2000 CDP contains less than 50 percent of the territory of a 1990 census CDP.

Historical Notes

All of the area of Mississippi except the part south of the 31st parallel was included in the original territory of the United States. The United States claimed the territory south of the 31st parallel as part of the Louisiana Purchase in 1803. Mississippi Territory was organized on April 7, 1798, from unorganized area; it included area west of Georgia to the Mississippi River, comprising the southern third of the present-day states of Alabama and Mississippi. The territory annexed the northern part of the same two future states when Georgia ceded its western claims in 1802 and the lands south of the 31st parallel in 1812. Mississippi Territory was reduced by the organization of Alabama Territory in 1817. Mississippi was admitted to the Union on December 10, 1817, as the 20th state, with generally the same boundary as the present state, although jurisdiction over the entire area was not formally accomplished until Spain relinquished its claims to the southern portion of the state in 1819.

Census data for Mississippi are available beginning with the 1800 census. The 1800 and 1810 populations do not include the area now within the state of Alabama even though that area was legally part of Mississippi Territory. The population of Mississippi Territory as legally existing for those censuses was 40,352 in 1810, and 8,550 in 1800.

GEOGRAPHIC NOTES

User Note 1

Mississippi is divided into 82 counties. The 410 county subdivisions in the state—five in each county—are nonfunctioning supervisors districts from which representatives are elected to the county board of supervisors. There are 297 incorporated places and 32 CDPs in Mississippi. Incorporated places in the state are legally described as cities, towns, and villages. The Census Bureau treats all incorporated places and CDPs as dependent within districts.

User Note 2

Table 5 does not show revised 1990 census counts for places that were located in more than one county subdivision. These places are listed below. Revisions to the 1990 census counts for whole places (indicated by the superscript prefix “r” next to the figure) can be found in Table 6.

- Charleston city, Tallahatchie County
- Forest city, Scott County
- Louisville city, Winston County
- McComb city, Pike County
- Oxford city, Lafayette County
- Prentiss town, Jefferson Davis County
- Winona city, Montgomery County

GEOGRAPHIC CHANGE NOTES

The Geographic Change Notes listed below document high-level geographic entities—counties, county subdivisions, and places—that are different from the information reported in the 1990 census. The notes identify geographic entities whose name and/or boundary have changed, entities that no longer exist, newly established entities (both legal and statistical), and changes in geographic relationships, such as places that exist in one county and have expanded into or withdrawn from another county (the notes do not identify the other county(ies) in which the entity exists; this can be determined from the Table listing all places in this publication) and places that have become independent of or dependent within one or more county subdivisions. The changes are reported by and within county. A few of the reported changes in name, legal status, or legal relationship may be incorrect; if so, the correct version is shown in any Correction Notes section above. Some changes are the result of legal actions that took place prior to the 1990 census, but were not reported in that census.

The change notes for previous censuses reported only changes that occurred primarily as the result of specific legal actions, as well as identifiable revisions to statistical entities (primarily county subdivisions). For Census 2000, the notes reflect any boundary change that affects a geographic entity, regardless of whether it is the result of legal action, redefinition of a statistical entity, correction of a previous boundary-reporting or -drafting error, or new erroneous information. For example, the county-level text “all districts revised” may reflect a legal redistricting of all county subdivisions in the county, a major or minor relocation of county subdivision boundaries due to more accurate mapping or more accurate boundary information, or a combination of these that, in one way or another, affect every county subdivision in a county. In states whose legal entities rarely undergo a legal boundary change, such as the New England states, most of the entities reported to have exchanged, gained, or lost territory did so as the result of mapping changes, not legal actions. The extent and location of the boundary changes affecting any particular entity can be determined by comparing the TIGER/Line® Files, Cartographic Boundary Files, or a comparable set of maps for the 1990 and 2000 censuses.

Appendixes

Several appendixes traditionally found in printed reports are now available in a separate volume. See PHC-3-A, *Population and Housing Unit Counts, Selected Appendixes*, in print or on the Internet at <http://www.census.gov/prod/cen2000/phc-3-a.pdf> for the following:

- Appendix A. Geographic Terms and Concepts
- Appendix B. Definitions of Subject Characteristics
- Appendix C. Data Collection and Processing Procedures
- Appendix D. Questionnaire
- Appendix E. Data Products and User Assistance
- Appendix G. Accuracy of the Data
- Appendix H. Acknowledgments

This Appendix section contains:

- Appendix F. Maps

County Subdivision Outline Map Legend and County Location Index

Map Legend

	CAMPO	American Indian Reservation (Federal)
	ZIA	Off-Reservation Trust Land
		State
	ERIE	County
	YORK	County Subdivision
	ROME	Incorporated Place
	Zena	Census Designated Place
	Lake Erie	Large River, Lake, Water Body, or Shoreline
		A fishhook joins contiguous and/or discontinuous parts of the same geographic entity

Map Sections

Note: All legal boundaries and names are as of January 1, 2000. Where state, county, and/or county subdivision boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The county boundary is always shown. Where a county subdivision boundary coincides with a place boundary, the map does not show the place boundary symbol. Any geographic entity name may include '(pt.)' if some portion of the entity extends beyond the limits of the map area displayed on the page, or if multiple discontinuous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts.)' if many discontinuous pieces exist for that entity that cannot be discretely labeled. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.

County Location Index

This list presents the reference coordinates for each county on the county subdivision outline map. Map section numbers refer to the county subdivision outline maps only.
