INTRODUCTION

Data from the 2010 Census for the United States and Puerto Rico are presented in two printed report series and a single report for American Indians and Alaska Natives by tribe:

1. CPH-1, *Summary Population and Housing Characteristics*
2. CPH-2, *Population and Housing Unit Counts*
3. CPH-3, *Characteristics of American Indians and Alaska Natives by Tribe*

The data from the 2010 Census were derived from a limited number of basic questions asked of the entire population and about every housing unit. Appendix D (see *Selected Appendixes* report at <www.census.gov/prod/cen2010/cph-2-a.pdf>) presents a facsimile of the questionnaire pages used to collect the data included in this report. Note that the “long form” data included in previous censuses are not included in the 2010 Census.

The CPH-1, *Summary Population and Housing Characteristics*, report series provides data based on age, Hispanic or Latino origin, household relationship, race, sex, tenure (owner- or renter-occupied), and vacancy characteristics. Land area measurements and population density also are provided. This series is similar to the Census 2000 PHC-1 series.

The CPH-2, *Population and Housing Unit Counts*, report series provides 2010 Census and historical comparisons of the population and housing unit counts. It also provides area measurements and density. The user notes section documents geographic changes over the past decade. This series is similar to the Census 2000 PHC-3 series.

In each series, there is one report for each state, the District of Columbia, and Puerto Rico, plus a United States summary report. Many tables in the United States summary reports include data for Puerto Rico.

The CPH-3, *Characteristics of American Indians and Alaska Natives by Tribe*, report provides population and housing information for selected American Indian and Alaska Native tribes. This report is similar to the Census 2000 PHC-5 report. This is a single report covering the entire United States.

HOW TO FIND GEOGRAPHIC AREAS AND SUBJECT MATTER DATA

This report includes a table finding guide to assist the user in locating those statistical tables that contain the desired data. The table finding guide lists alphabetically, by geographic area, the subjects shown in this report. To determine which tables in this report show data for a particular topic, find the subject in the left-hand column of the table finding guide and then look across the columns using the headings at the top for the desired type of geographic area. Figure I-1 is an example of a table finding guide.

The table finding guide does not include cross-classification of subject-matter items. Additional information to locate data within specific reports is provided in the headnote at the top of the table finding guide and in the footnotes at the bottom of the guide.

SUBJECTS BY TYPE OF GEOGRAPHIC AREA AND TABLE NUMBER

The types of geographic areas covered in this report are shown on the side, and subjects are shown at the top. See CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes* (<www.census.gov/prod/cen2010/cph-2-a.pdf>), for a description of area classifications (Appendix A) and for definitions and explanations of subject characteristics (Appendix B).

¹ State, District of Columbia, or Puerto Rico.

² Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

³ County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

HOW TO USE THE STATISTICAL TABLES

Parts of a Statistical Table

The census data included in printed reports are arranged in tables. Each table includes four major parts: (1) heading, (2) boxhead, (3) stub, and (4) data field. A typical census report table is illustrated in Figure I-2.

The heading consists of the table number, title, and headnote. The table number indicates the position of the table within the report, while the title is a brief statement indicating the subjects and time reference of the data presented in the table. The headnote is enclosed in brackets and is located under the title. It contains statements that qualify, explain, or provide information pertaining to the entire table.

Report title

The boxhead is under the heading. This portion of the table, which contains the individual column heads or captions, describes the data in each vertical column. In the boxhead of many tables, a spanner appears across and above two or more column heads or across two or more lower spanners. The purpose of a spanner is to classify or qualify items below it or separate the table into identifiable blocks in terms of major aspects of the data.

The stub is located at the left edge of the table. It includes a listing of line or row captions or descriptions. At the top of the stub is the stubhead. The stubhead is considered to be an extension of the table title and usually shows generic geographic area designations and restrictions.

In the stub, several features are used to help the user better understand the contents of the table. Usually, a block of data lines is preceded by a sidehead. The sidehead, similar to a spanner, describes and classifies the stub entries following it. The use of indentation in a stub indicates the relationship of one data line to another. Indented data lines represent subcategories that, in most instances, sum to a total. Occasionally in tables, it is desirable to show one or more single-line subcategories that do not sum to the total.

The data field is that part of the statistical table that contains the data. It extends from the bottom of the boxhead to the bottom of the table and from the right of the stub to the right edge of the page.

Both geographic and subject-matter terms appear in tables. It is important to read the definitions of the terms used in the tables because census terms often are defined in special ways that reflect the manner in which the questions were asked and the data were tabulated. Definitions of geographic terms are provided in Appendix A of CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes* (<www.census.gov/prod/cen2010/cph-2-a.pdf>). Census tables often include derived measures such as medians, means, percentages, and ratios. These and other subject-matter terms are defined in Appendix B of the same report.

Symbols and Geographic Abbreviations

The following symbols are used in the tables and explanations of subjects covered in 2010 Census reports:

- A dash “–” represents zero or a derived measure that rounds to less than 0.1.
- (X) means not applicable. In the 1990 and earlier decennial census reports, three dots “. . .” meant not applicable.
- (NA) means not available.
- The superscript prefix “r” indicates that a Census 2000 count has been revised since the publication of the Census 2000 reports as a result of certified Count Question Resolution (CQR) changes (see also <www.census.gov/prod/cen2000/notes/errata.pdf>). This symbol appears only in the 2010 Census CPH-2, *Population and Housing Unit Counts*, report series.
- A minus sign “–” preceding a figure denotes decrease. The minus sign appears only in the 2010 Census CPH-2, *Population and Housing Unit Counts*, report series.

The following are examples of geographic abbreviations and terms that may be used in the tables in this report:

- A “(part)” next to the name of a geographic area in a hierarchical presentation indicates that the geographic entity is located only partially in the superior geographic entity. For example, a “(part)” next to a place name in a county subdivision-place hierarchy indicates that the place is located in more than one county subdivision. (Places also may be “split” by county, congressional district, urban/rural, metropolitan area, voting district, and other geographic boundaries, depending on the presentation.) Other geographic entities also can be “split” by a higher-level entity. The exception is a tabulation block, which is unique within all geographic entities in census products.
- ANVSA is Alaska Native village statistical area.
- ANRC is Alaska Native Regional Corporation.
- CCD is census county division.
- CDP is census designated place.
- CSA is combined statistical area.
- NECTA is New England city and town area.
- Metro Area is metropolitan statistical area.

- Micro Area is micropolitan statistical area.
- OTSA is Oklahoma tribal statistical area.
- SDTSA is state designated tribal statistical area.
- TDSA is tribal designated statistical area.
- UT is unorganized territory.

GRAPHICS

Charts, statistical maps, and other graphic summaries are included in some 2010 Census reports.

USER NOTES

User notes include general explanatory information, historical notes, and geographic notes. They also provide information about unique characteristics of the report and sometimes changes or corrections made too late to be reflected in the text or tables themselves. However, sometimes this information becomes available too late to be reflected even in the user notes. Therefore, updates are available in the *Notes and Errata* document at <www.census.gov/prod/cen2010/notes/errata.pdf>.

APPENDIXES

Appendixes A through D, and F through H, described below, are in the separate printed volume, CPH-2-A, *Population and Housing Unit Counts, Selected Appendixes*, or on the Internet at <www.census.gov/prod/cen2010/cph-2-a.pdf>. Appendix E is included in this report.

Appendix A, Geographic Terms and Concepts. Provides definitions of the types of geographic areas and related information used in census products.

Appendix B, Definitions of Subject Characteristics. Contains definitions for the subject-matter terms used in census products, including explanations of derived measures, limitations of the data, and comparability with previous censuses. The subjects are listed alphabetically. Population characteristics are defined first, followed by the definitions of the housing subjects.

Appendix C, Data Collection and Processing Procedures. Explains the 2010 Census mission and scope and provides thumbnail descriptions of 2010 Census operations.

Appendix D, Questionnaire. Presents a facsimile of the 2010 Census questionnaire used to collect the data in this report.

Appendix E, Maps. Contains maps depicting the geographic areas shown in this report.

Appendix F, Operational Overview and Accuracy of the Data. Provides information on 2010 Census operations, including group quarters enumeration, confidentiality of the data, imputation of housing unit status and population counts, sources of errors in the data, and data editing.

Appendix G, Residence Rule and Residence Situations for the 2010 Census of the United States. Contains a description of the residence rule and residence situations used by Census Bureau staff to guide decisions on where people should be counted in the 2010 Census. This document is the basis for residence-related sections of questionnaires, collection instruments, field materials, and training materials.

Appendix H, Acknowledgments. Lists many of the U.S. Census Bureau staff who participated in report preparation.

¹ State, District of Columbia, or Puerto Rico.

² Parish in Louisiana; city and borough, municipality, borough, or census area in Alaska; and municipio in Puerto Rico; in Maryland, Missouri, Nevada, and Virginia, one or more cities are independent of counties and are treated as statistical equivalents of counties; the entire District of Columbia, which has no counties, is treated as a county equivalent.

³ County subdivisions within the state are shown alphabetically with places for the following 12 states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

User Notes

Additional information concerning this 2010 Census product may become available after this report is published. This information, called *Notes and Errata*, is available in portable document format (PDF) on the U.S. Census Bureau's Internet site at <www.census.gov/prod/cen2010/notes/errata.pdf>.

GENERAL NOTES

User Note 1

In Alaska, the entity equivalent to a county is termed a borough, census area, city and borough, or municipality. All references to "county" in the user notes refer to these entity types.

User Note 2

The user should be aware that there are limitations to many of these data. Please refer to the text provided with this report for further explanation of the limitations of the data. The population and other data shown for the 2010 Census in this report are as of April 1, 2010; the boundaries used for all geographic entities are as of January 1, 2010. All boundaries are intended for Census Bureau statistical data collection and presentation only; their depiction and designation for statistical purposes do not constitute a determination of jurisdictional authority or entitlement. Corrections to the 2010 Census data as a result of certified Count Question Resolution (CQR) changes are available from the Census Bureau's Internet site at <www.census.gov/prod/cen2010/notes/errata.pdf>.

User Note 3

Data comparability for county subdivisions is shown only when the county subdivision contains substantially the same territory as reported for Census 2000 (generally defined as at least 60 percent of the previous territory). There is no comparability provided for county subdivisions that have been extensively revised. Revised entities are noted by and within county. Changes to a geographic entity can be the result of legal change actions, statistical redefinition, correction of previous boundary or drafting errors, or new erroneous information.

Incorporated place and census designated place (CDP) comparability is provided for all places that retained their name or general area without regard to the amount of territorial change between censuses. Place comparability is not shown if the entity is new for the 2010 Census or is the result of a merger that created an entirely new entity, or if a 2010 Census geographic area shares no area with a Census 2000 area of the same name. American Indian area (including tribal subdivisions), Alaska Native area, and Hawaiian home land comparability follows the same rules as for place comparability.

User Note 4

When applicable, tables show the revised Census 2000 population and/or housing unit counts that resulted from the Count Question Resolution (CQR) program. These revised counts are accompanied by a prefix "r" symbol in the data tables.

Derived values (e.g., percent distribution, density, or change) that are calculated from Census 2000 population or housing unit counts only account for the aforementioned CQR revisions in certain cases.

- Calculations include the corrected Census 2000 counts when a table:
 - Shows population or housing unit change (or percent change) from 2000 to 2010.
 - Shows population or housing unit change (or percent change) from 1990 to 2000, and also shows the 2000 population or housing unit count that it is derived from.

-
- Shows population or housing unit density or percent distribution in 2000, and also shows the 2000 population or housing unit count that it is derived from.
 - Calculations do not include the corrected Census 2000 counts when a table:
 - Shows population or housing unit change (or percent change) from 1990 to 2000, but does not show the 2000 population or housing unit count that it is derived from.
 - Shows population or housing unit density or percent distribution in 2000, but does not show the 2000 population or housing unit count that it is derived from.
 - When a table shows component parts of a revised 2000 population or housing unit count (e.g., classified by urban/rural or by size of place), the component parts may not sum to the total population or housing unit count, because the component parts were not revised during the 2000 CQR program. Therefore, any derived values (e.g., percent distribution or number of places by population size) for the component parts cannot account for the revised Census 2000 counts either.

CORRECTION NOTES

Sitka city and borough [place], Sitka City and Borough

Sitka city and borough [place] should be coextensive with Sitka City and Borough [county equivalent]. Sitka city and borough [place] should include Blocks 5013, 5016, and 5017 in Census Tract 2; they are incorrectly coded as not in any place. The affected area contains 0 population, 0 housing units, and a water area of 116,123 square meters (0.044 square miles). The corrected water area for Sitka city and borough [place] is 5,027,404,028 square meters (1,941.092 square miles).

HISTORICAL NOTES

The United States acquired the area of Alaska by purchase from Russia in 1867, with generally the same boundary as the present state. The formal boundary between the southeastern portion of Alaska and Canada was settled by treaty in 1903. Alaska Territory was organized on August 24, 1912. Alaska was admitted to the Union on January 3, 1959, as the 49th state.

Alaska was not enumerated in the 1870 census even though the area was part of the United States. Census data for Alaska are available beginning with the 1880 census.

GEOGRAPHIC NOTES

User Note 1

Alaska is partially divided into 18 legal entities identified in state law as boroughs, but having legal descriptions of borough (12), city and borough (4), and municipality (2). The Census Bureau treats these entities as equivalent to counties in other states. Four county-level entities are legally referred to as unified home rule boroughs: Anchorage Municipality, Juneau City and Borough, Sitka City and Borough, and Wrangell City and Borough. Each is governmentally and geographically consolidated with a place-level entity with the same name and legal description. Skagway Municipality and Yakutat City and Borough are non-unified home rule boroughs; the Census Bureau does not treat them as governmentally consolidated with any incorporated place because state law allows cities to incorporate within non-unified home rule boroughs. The remainder of the state is legally referred to as the unorganized borough. For census data presentation purposes, officials of the state of Alaska, in cooperation with the Census Bureau, subdivided the unorganized borough into 11 statistical entities termed census areas. The county-level entities are subdivided into 37 census subareas, which are statistical subdivisions delineated for presentation of decennial census data. There are 148 incorporated places and 207 CDPs in Alaska. Incorporated places in the state are legally described as cities, city and boroughs, and municipalities. The Census Bureau treats all incorporated places and CDPs as dependent within census subareas.

User Note 2

Wrangell City and Borough and Petersburg Census Area organized from former Wrangell-Petersburg Census Area in 2008. Part of Skagway-Hoonah-Angoon Census Area organized as Skagway Municipality and remaining area renamed Hoonah Angoon Census Area in 2007. Several county-level entities, previously referred to as boroughs, were reidentified to reflect the correct legal description between 1990 and 2000: Anchorage changed to a Municipality and Juneau and Sitka to a City and Borough.

Boroughs, city and boroughs, municipalities, and census areas replaced the census divisions of 1970 as county equivalents; 1970 figures are shown where comparable data are available. The changes that occurred between 1980 and 2000 are: Aleutians East Borough was organized from parts of Aleutian Islands Census Area and Dillingham Census Area in 1987. Aleutians West Census Area was created in 1987 from the balance of Aleutian Islands Census Area that did not become part of Aleutians East Borough. Denali Borough was organized from parts of Southeast Fairbanks and Yukon-Koyukuk Census Areas in 1990. Lake and Peninsula Borough was organized from part of Dillingham Census Area in 1989. Northwest Arctic Borough was organized from all of Kobuk Census Area and part of North Slope Borough in 1982. GEOGRAPHIC CHANGE NOTES

The Geographic Change Notes listed below document high-level geographic entities—American Indian areas, Alaska Native areas, and Hawaiian home lands; counties and their equivalents; county subdivisions; and places—that are different from the information reported in Census 2000. The notes identify geographic entities whose name, legal description, and/or boundary have changed, entities that no longer exist, newly established entities (both legal and statistical), and changes in geographic relationships, such as places that exist in one county and have expanded into or withdrawn from another county (the notes do not identify the other county(ies) in which the entity exists; this can be determined from Table 9 of this publication), places that have been removed from comparable 2000 county subdivisions, and places that have become independent of or dependent within one or more county subdivisions. The changes are reported by and within county; counties without changes are not shown in the listing. Changes to American Indian areas, Alaska Native areas, and Hawaiian home lands appear after the list of counties; areas with no changes are not shown. A few of the reported changes in name, legal status, or legal relationship may be incorrect; if so, the correct version is shown in any Correction Notes section above. Some changes are the result of legal actions that took place prior to Census 2000 but were not reported in that census.

For the 2010 Census, the notes reflect any boundary change that affects a geographic entity, regardless of whether it is the result of legal action, redefinition of a statistical entity, correction of a previous drafting error, or new erroneous information. Between Census 2000 and the 2010 Census, the Census Bureau invested in improving the coordinate accuracy of its geographic database. As a result, the geographic positions of boundaries may be different between the two censuses even though little or no change actually occurred to the boundaries. In compiling the Geographic Change Notes, the Census Bureau inspected the many corrections to determine if a change actually affected significant land area or population. For example, the county-level text “all MCDs [minor civil divisions] revised” may reflect a legal redistricting of all county subdivisions in the county, a major or minor relocation of county subdivision boundaries due to more accurate mapping or more accurate boundary information, or a combination of these that, in one way or another, affect every county subdivision in a county. Boundary corrections that resulted in incorporated places gaining or losing territory are shown as annexations or detachments even if no legal action occurred between 2000 and 2010. Most places shown with a detachment resulted from such corrections. In states whose legal entities rarely undergo a legal boundary change, such as the New England states, most of the entities reported to have annexed, detached, exchanged, gained, or lost territory did so as the result of mapping changes, not legal actions. The extent and location of the boundary changes affecting any particular entity can be determined by comparing the TIGER/Line® Shapefiles, Cartographic Boundary Files, or a comparable set of maps for the 2000 and 2010 censuses.

¹ A '*' following a place name indicates that the place is coextensive with a separate census subarea. The census subarea name is shown only if different than the name of the place.

Note: All legal and statistical area boundaries and names are as of January 1, 2010. Where international, state, borough, census area, city and borough, municipality, and/or census subarea boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The borough, census area, city and borough, and municipality boundaries are always shown. Where a census subarea boundary coincides with a place boundary, the map does not show the place boundary symbol. Where American Indian Reservation (Federal), Alaska Native Regional Corporation, and/or Alaska Native Village Statistical Area boundaries coincide with a census subarea boundary, the map does not show the census subarea boundary symbol. Any geographic entity name may include '(pt)' if some portion of the entity extends beyond the limits of the map area displayed on the page, or if multiple discontinuous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts)' if many discontinuous pieces exist for that entity that cannot be discretely labeled. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.
