

Connect to UNT Wi-Fi using Android devices

1. Select **Settings**.
2. Select **Wireless & Networks**.
3. Select **Wi-Fi**
4. Make sure Wi-Fi is turned on.
5. Select the **UNT** network.

6. Configure UNT as follows:
 - EAP method: **PEAP**
 - Phase 2 authentication: **MSCHAPV2**
 - Identity: Your EUID
 - Anonymous Identity: Leave blank
 - Password: Password associated with you EUID
 - If you have CA Certificate option, choose 'Do not validate'

(You will be warned that the connection is not private, but the UNT network does provide a secure tunnel even without the certificate.)

Connect to UNT Wi-Fi using Android devices

The screenshot shows the configuration interface for connecting to the UNT Wi-Fi network. The interface is titled "UNT" in blue text. It contains several fields and options:

- EAP method:** A dropdown menu with "PEAP" selected.
- Phase 2 authentication:** A dropdown menu with "MSCHAPV2" selected.
- CA certificate:** A dropdown menu with "Do not validate" selected. Below this field, a warning message reads: "No certificate specified. Your connection will not be private."
- Identity:** A text input field containing "Scrappy".
- Anonymous identity:** An empty text input field.
- Password:** A text input field with a blue border and a light blue background, containing a series of dots to mask the password.
- Show password:** An unchecked checkbox.
- Advanced options:** A label with a downward-pointing chevron icon.

At the bottom of the screen, there are two buttons: "Cancel" on the left and "Save" on the right, both in blue text.

7. Select **Connect**. Your Android device should now be connected to the UNT wireless network.
