A Criminal Justice Information Policy Report

December 2015

Criminal Justice Information Policy

U.S. Department of Justice
Bureau of Justice Statistics

William J. Sabol, Ph.D.
Director

Acknowledgments. This report was prepared by SEARCH, The National Consortium for Justice Information and Statistics, Brad Truitt, Chairman, and Scott M. Came, Executive Director. The project director was Becki R. Goggins, Director, Law and Policy. Ms. Goggins and Dennis A. DeBacco, Justice Information Services Specialist, Law and Policy, authored the report. Mr. DeBacco conducted the survey and compiled the results. Support was provided by Twyla R. Putt, Manager, Corporate Communications; Jane L. Bassett, Corporate Communications Specialist; and Christine E. Lee, Webmaster. This project was supported by Cooperative Agreement No. 2011-MU-MU-K054 awarded by the Bureau of Justice Statistics (BJS), Office of Justice Programs, U.S. Department of Justice (USDOJ) to SEARCH, The National Consortium for Justice Information and Statistics, 7311 Greenhaven Drive, Suite 270, Sacramento, California 95831. The Federal project monitor was Devon B. Adams, Chief, Criminal Justice Data Improvement Program, USDOJ/BJS. Points of view in this document are those of the authors and do not necessarily represent the official position or policies of the U.S. Department of Justice.

Glossary of terms

Automated fingerprint identification system (AFIS): An automated system for searching fingerprint files and transmitting fingerprint images. AFIS computer equipment can scan fingerprint impressions (or use electronically transmitted fingerprint images) and automatically extract and digitize ridge details and other identifying characteristics in sufficient detail to enable the computer's searching and matching components to distinguish a single fingerprint from thousands or even millions of fingerprints previously scanned and stored in digital form in the computer's memory. The process eliminates the manual searching of fingerprint files and increases the speed and accuracy of ten-print processing (arrest fingerprint cards and noncriminal justice applicant fingerprint cards).

AFIS equipment also can be used to identify individuals from "latent" (crime scene) fingerprints, even fragmentary prints of single fingers in some cases.

Criminal history record information (CHRI) or criminal history record information system: A record (or the system maintaining such records) that includes individual identifiers and describes an individual's arrests and subsequent dispositions. Criminal history records do not include intelligence or investigative data or sociological data such as drug use history.

CHRI systems usually include information on juveniles if they are tried as adults in criminal courts. Most, however, do not include data describing involvement of an individual in the juvenile justice system. Data in CHRI systems are usually backed by fingerprints of the record subjects to provide positive identification. State legislation and

practices vary widely concerning disclosure of juvenile record information and access to criminal history records for noncriminal justice purposes.

Data quality: The extent to which criminal history records are complete, accurate, and timely. In addition, accessibility sometimes is considered a data quality factor. The key concern in data quality is the completeness of records and the extent to which records include dispositions as well as arrest and charge information. Other concerns include the timeliness of data reporting to state and Federal repositories, the timeliness of data entry by the repositories, the readability of criminal history records, and the ability to have access to the records when necessary.

Interstate Identification Index (III): A fingerprint-supported "index-pointer" system for the interstate exchange of criminal history records. Under III, the Federal Bureau of Investigation (FBI) maintains an identification index to persons arrested for primarily felonies or serious misdemeanors under state or Federal law. The index includes identification information (such as name, date of birth, race, and sex), FBI Numbers, and State Identification Numbers (SID) from each state that holds information about an individual.

Search inquiries from criminal justice agencies nationwide are transmitted automatically via state telecommunications networks and the FBI's National Crime Information Center (NCIC) telecommunications lines. Searches are made on the basis of name and other identifiers. The process is entirely automated. If a hit is made against the Index, record requests are made using the SID or FBI Number, and data are automatically retrieved from each repository holding records on the individual and forwarded to the requesting agency. As of October 5, 2008,

all 50 states and the District of Columbia participated in III. Responses are provided from FBI files when a jurisdiction, such as a U.S. territory, is not a participant in III. The III system may also be employed when responding to fingerprint-based noncriminal justice purpose record background checks.

Participation in III requires that a state maintain an automated criminal history record system capable of interfacing with the III system and also capable of responding automatically to all interstate and Federal/state record requests.

Juvenile justice records: Official records of juvenile justice adjudications. Most adult criminal history record systems do not accept such records, which are frequently not supported by fingerprints and which usually are confidential under state law. The FBI accepts and disseminates juvenile records. States, however, are not required to submit such records to the FBI and may be legislatively prohibited from doing so.

Lights-out processing: “Lights-out” criminal record processing occurs when fingerprint data submitted to a criminal record repository by a local justice jurisdiction for the purpose of determining an individual’s identity, and frequently associated criminal history record information, is processed electronically and a response is returned electronically to the submitting jurisdiction, all without human intervention.

Livescan: The term “livescan” refers to both the technique and technology used to electronically capture fingerprint and palm print images without the need for the more traditional ink-and-paper methods. Livescan devices also allow the electronic transfer of

digitized images and accompanying textual information to a criminal history repository.

National Crime Information Center (NCIC): A computerized information system available to law enforcement and criminal justice agencies maintained by the FBI. The system includes records for wanted persons, missing persons, other persons who pose a threat to officer and public safety, and various property files. The III is accessible through the NCIC system. The NCIC operates under a shared-management concept between the FBI and local, state, tribal, and Federal criminal justice agencies. The FBI maintains the host computer and provides a telecommunications network to the Criminal Justice Information Services Systems Agency (CSA) in each of the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and Canada, as well as Federal criminal justice agencies. A CSA is a criminal justice agency that has overall responsibility for the administration and usage of NCIC within a district, state, territory, or Federal agency. NCIC data may be provided only for criminal justice and other specifically authorized purposes.

National Crime Prevention and Privacy Compact: An interstate and Federal/state compact that establishes formal procedures and governance structures for the use of the III. It is designed to facilitate the exchange of criminal history data among states for noncriminal justice purposes and to eliminate the need for the FBI to maintain duplicate data about state offenders. Under the Compact, the operation of this system is overseen by a policymaking council comprised of state and Federal officials.

The key concept underlying the Compact is agreement among all signatory states that all criminal history information (except sealed records) will be provided in response to noncriminal justice requests from another state—regardless of whether the information

being requested would be permitted to be disseminated for a similar noncriminal justice purpose within the state holding the data. (That is, the law of the state that is *inquiring* about the data—rather than the law of the state that *originated* the data—governs its use.) In some cases, ratification of the Compact will have the effect of amending existing state legislation governing interstate record dissemination, since most states do not currently authorize dissemination to all of the Federal agencies and out-of-state users authorized under the Compact. Noncriminal justice inquiries sent to the FBI are handled by a combination of information retrieval by the FBI from its files of voluntarily contributed state arrest and disposition records and by accessing state-held information. This requires that the FBI maintain duplicates of state records (see National Fingerprint File discussion for exception) and generally results in less complete records being provided, since FBI files of state records are not always as complete due to reporting deficiencies.

The Compact was passed by Congress and signed into law by President Clinton in October 1998. The Compact became effective in April 1999, following ratification by two state legislatures: Montana on April 8, 1999, and Georgia on April 28, 1999. As of April 2013, 28 additional states have entered into the Compact: Nevada (May 1999); Florida (June 1999); Colorado (March 2000); Iowa (April 2000); Connecticut (June 2000); South Carolina (June 2000); Arkansas (February 2001); Kansas (April 2001); Alaska (May 2001); Oklahoma (May 2001); Maine (June 2001); New Jersey (January 2002); Minnesota (March 2002); Arizona (April 2002); Tennessee (May 2003); North Carolina (June 2003); New Hampshire (June 2003); Missouri (July 2003); Ohio (January 2004); Wyoming (February 2005); Idaho

(March 2005); Maryland (May 2005); Oregon (July 2005); West Virginia (March 2006); Hawaii (May 2006); Michigan (January 2009); Vermont (July 2010); and New York (March 2013). Eleven other states and territories have signed a Memorandum of Understanding indicating compliance with the Privacy Compact: American Samoa, Guam, Illinois, Kentucky, Mississippi, Nebraska, New Mexico, North Dakota, Puerto Rico, South Dakota, and Virginia.

National Fingerprint File (NFF): A system and procedures designed as a component of the III system, which, when fully implemented, would establish a totally decentralized system for the interstate exchange of criminal history records. The NFF will contain fingerprints of Federal offenders and at least one set of fingerprints on state offenders from each state in which an offender has been arrested, primarily for a felony or a serious misdemeanor. Under the NFF concept, states are required to forward only the first-arrest fingerprints of an individual to the FBI, accompanied by other identification data such as name and date of birth.

Fingerprints for subsequent arrests are not required to be forwarded. Disposition data on the individual also is retained at the state repository and is not forwarded to the FBI. Upon receipt of the first-arrest fingerprint card (or electronic images), the FBI enters the individual's fingerprint information, name and identifiers in the III, together with an FBI Number and an SID Number for each state maintaining a record on the individual. Charge and disposition information on state offenders are maintained only at the state level, and state repositories are required to respond to all authorized record requests concerning these individuals for both criminal justice and noncriminal justice purposes. States are required to release all data on record subjects for noncriminal justice inquiries, regardless of whether the data could legally be released for

similar purposes within the state. As of January 2015, the NFF has been implemented in 19 states: Colorado, Florida, Georgia, Hawaii, Idaho, Iowa, Kansas, Maryland, Minnesota, Missouri, Montana, New Jersey, North Carolina, Ohio, Oklahoma, Oregon, Tennessee, West Virginia, and Wyoming.

Next Generation Identification (NGI):

The NGI system, developed over multiple years, is an incremental replacement of the FBI's Integrated Automated Fingerprint Identification System (IAFIS) that provides new functionality and improves existing capabilities. This technological upgrade accommodates increased information processing and sharing demands from local, state, tribal, Federal, and international agencies. The NGI system offers state-of-the-art biometric identification services and compiles core capabilities that serve as the platform for multimodal functionality. Achievement of full operational capabilities of NGI was attained on September 15, 2014.

Positive Identification: Identifying an individual using biometric characteristics that are unique and not subject to alteration. In present usage, the term refers to identification by fingerprints, but may also include identification by iris images, voiceprints, or other techniques. Positive identification is distinguished from identification using name, sex, date of birth, or other personal identifiers as shown on a document that could be subject to alteration or counterfeit, such as a birth certificate, Social Security card, or driver's license. Because individuals can have identical or similar names, ages, etc., identifications based on such characteristics are not reliable.

Rap back: A “rap back” or “hit notice” program will inform an employer or other designated entity when an individual who has undergone a fingerprint-based background check—and whose fingerprints are retained by a criminal history repository after the check—is subsequently arrested. His or her fingerprints, obtained after the arrest, are matched against a database that contains the fingerprints that were initially submitted. The employer or designated entity is then notified of the individual's arrest. There is a fee for the service in some states; other states provide the service free. Some states also provide “rap back” services for notifications within the criminal justice system. For example, this might involve a notification to a parole or probation officer of the arrest of a person under supervision.

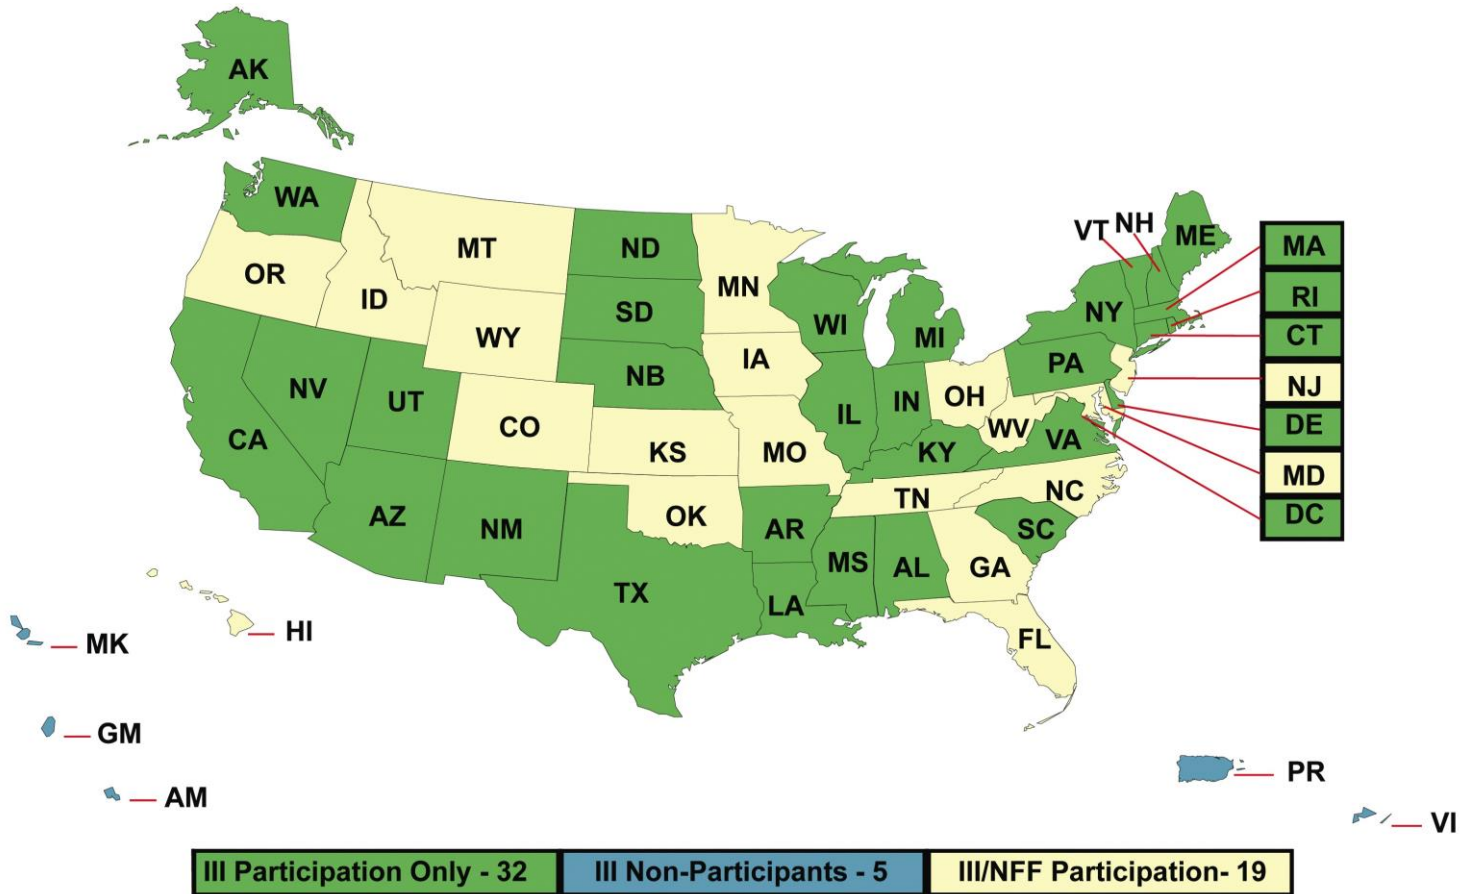

State central repository: The database (or the agency housing the database) that maintains criminal history records on all state offenders. Records include fingerprint files and files containing identification segments and notations of arrests and dispositions. The central repository is generally responsible for state-level identification of arrestees. The repository agency often is the Criminal Justice Information Services Systems Agency (CSA) for contact with FBI record systems. Non-fingerprint-based inquiries from local agencies for a national records check are routed to the FBI via the central repository. Although usually housed in the Department of Public Safety, the central repository is maintained in some states by the State Police, Attorney General, or other state agency.

Maps

Compact States and Territories (April 10, 2013)

Interstate Identification Index (III) National Fingerprint File (NFF) (January 13, 2015)

Note to readers

This is the thirteenth survey of criminal history information systems conducted by SEARCH, The National Consortium for Justice Information and Statistics, since 1989. Some of the tables include data from previous surveys. Use caution in drawing comparisons between the results of earlier surveys and the data reported here. Over the course of the survey years, the U.S. Department of Justice, Bureau of Justice Statistics (BJS), has continued to administer assistance programs dedicated to improving criminal history records. As a result, some states focused new or additional resources on the condition of their records and, in many cases, know more about their records today than in the past. Similarly, expansion, advancement, and adoption of technology have also made a beneficial impact. Some state repositories, however, have suffered fiscal cutbacks and consequently have had to shift priorities away from certain criminal history information management tasks. For these and other reasons, trend comparisons may not as accurately reflect the status of each state's criminal history records as the current data considered alone.

Survey revisions

Given the dramatic advances in information technology, legislative and social trends that increase demand for criminal history record access, and the need for criminal record managers to respond to these developments, BJS and SEARCH conducted an in-depth review of the previous survey questions and developed a revised survey instrument for 2014.

SEARCH updated formats for easier response and collection of data and also added new questions to collect information on new and emerging information sharing practices. Many of these changes were suggested by users and respondents during the review process. Comments and suggestions focused on:

- increasing data on wanted person and disposition reporting
- charge tracking and record flagging
- livescan usage and repository operations
- rap back services
- how information is disseminated and how it is used.

SEARCH continues to use an online database system to collect more complete and comprehensive survey data. Features include online, password-protected reporting forms that allow respondents to complete and submit individual sections of the survey, as well as to examine/update previously submitted portions.

The *Survey of State Criminal History Information Systems, 2014* consists of 36 data tables of information, and reflects the evolving criminal record management environment.

Introduction

This report is based upon the results from a survey conducted of the administrators of the state criminal history record repositories in March–June 2015. SEARCH surveyed 56 jurisdictions, including the 50 states, the District of Columbia, American Samoa, the Territory of Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands.¹ All 50 states, the District of Columbia, Guam, and Puerto Rico submitted survey responses. This report presents a snapshot as of December 31, 2014.

Throughout this report, the 50 states are referred to as “states”; the District of Columbia, American Samoa, Guam, Puerto Rico, the Northern Mariana Islands, and the Virgin Islands are referred to as “territories,” and “Nation” refers collectively to both states and territories.

¹ Hereafter, these territories are referred to as the District of Columbia, American Samoa, Guam, Puerto Rico, the Northern Mariana Islands, and the Virgin Islands.

In addition, the Federal Bureau of Investigation (FBI) was the source for some of the information relating to criminal history records, including state participation in the Interstate Identification Index (III) system (the national criminal records exchange system) and the number of III records maintained by the FBI on behalf of the states; the number of records in the wanted person file; and the protection order file of the FBI’s National Crime Information Center (NCIC) database.

Major findings

Criminal history files

Overview of state criminal history record systems, December 31, 2014 (table 1):

- Forty-nine states, the District of Columbia, Guam, and Puerto Rico report the total number of persons in their criminal history files as 105,569,200, of which 100,024,400 are automated records. (An individual offender may have records in more than one state.)
- Twenty-nine states, the District of Columbia, Guam, and Puerto Rico have fully automated criminal history files.

Level of disposition reporting

Overview of state criminal history record systems, December 31, 2014 (table 1):

- Seventeen states and Guam, representing 38% of the individual offenders in the Nation’s criminal history records, report that 80% or more arrests within the past 5 years in the criminal history database have final dispositions recorded.
- Twenty-five states and Guam, representing 49% of the individual offenders in the Nation’s criminal history records, report that 70% or more arrests within the past 5 years in the criminal history database have final dispositions recorded.
- Twenty-nine states and Guam, representing 59% of the individual offenders in the Nation’s criminal history records, report that 60% or more arrests within the past 5 years in the criminal history database have final dispositions recorded.
- When arrests older than 5 years are considered:

- Twenty-one states and Guam, representing 41% of the individual offenders in the Nation’s criminal history records, report that 80% or more arrests in the entire criminal history database have final dispositions recorded.
- Twenty-six states and Guam, representing 54% of the individual offenders in the Nation’s criminal history records, report that 70% or more arrests in the entire criminal history database have final dispositions recorded.
- Thirty-one states and Guam, representing 65% of the individual offenders in the Nation’s criminal history records, report that 60% or more arrests in the entire criminal history database have final dispositions recorded.

- In 11 states and Guam, 90% or more felony charges have a final disposition recorded in the criminal history database. In 19 states and Guam, 80% or more felony charges have a final disposition recorded in the criminal history database.

Overview of state criminal history record system functions, 2014 (table 1a):

- Fifty states, the District of Columbia, Guam, and Puerto Rico processed 23,886,000 fingerprint records in 2014; of these, 11,687,700 were used for criminal justice purposes and 12,198,500 were used and submitted for noncriminal justice licensing, employment, and regulatory purposes.
- In 14 states and Guam, fingerprints processed for criminal justice purposes account for 60% or more of the state’s total number of fingerprints processed.
- Thirty-seven states, the District of Columbia, Guam, and Puerto Rico retain all fingerprints processed for criminal justice purposes.

- Ten states do not retain any fingerprints processed as part of conducting noncriminal justice background checks.

Detailed findings

Status of state criminal history files

Number of subjects (individual offenders) in state criminal history file, 2010, 2012, and 2014 (table 2):

- Ninety-five percent of the approximately 105 million criminal history records maintained by the state criminal history repositories are automated.
- Five states (Arizona, California, Connecticut, Michigan, and Oregon) report an overall decrease in the total number of subjects in manual and automated files between 2012 and 2014.
- Four states (Louisiana, Massachusetts, Mississippi, and New York) report an overall increase of at least 20% in the total number of subjects in manual and automated files between 2012 and 2014.

- Forty-five states, Guam, and Puerto Rico report an overall increase in the total number of subjects in manual and automated files between 2012 and 2014.

Criminal history records of Interstate Identification Index (III) participants maintained by state criminal history repositories and the Federal Bureau of Investigation (FBI), 2014 as of January 14, 2015 (table 21):

- Nationwide, over 85.9 million criminal history records are accessible through the III. The states maintain 70% of all III records and the FBI maintains 30%.

Biometric and image data

Biometric and image data collection by state criminal history repository, 2014 (table 3):

- Twenty-five states, the District of Columbia, and Guam reported accepting latent fingerprint images.
- Eleven states, the District of Columbia, and Guam accept flat fingerprint images.

- Twelve states accept 2-finger print images for identification purposes.
- Fifteen states accept 10-finger print images for making incarceration/release decisions.
- Twenty-one states, the District of Columbia, and Guam accept palm print images.
- Ten states and the District of Columbia accept facial images or digitized mug shots. Three states accept facial recognition data and associated biometric information.
- Three states (Illinois, Michigan, and Minnesota) report accepting biometric information regarding scars, marks, and tattoos.
- One state (California) captures biometric iris information and one state reports accepting less than 10-finger print images for disposition reporting/processing purposes.

Protection order information

Protection order information and record counts, 2014 (table 4):

- Forty-two states, the District of Columbia, and Guam maintain protection order files, which total over 2.1 million records.
- All states, the District of Columbia, Guam, and the Virgin Islands enter protection order records onto NCIC, totaling over 1.4 million records.
- Protection orders in 24 states, the District of Columbia, and Guam are entered into state protection order files by courts.
- In 8 states without protection order files, all indicate that law enforcement agencies enter protection orders directly to NCIC.

Warrants and wanted persons

Warrant and wanted person file information, 2014 (table 5),

Warrant and wanted person file record counts, 2014 (table 5a):

- Forty states, the District of Columbia, Guam, and Puerto Rico maintain warrant files, which total over 7.8 million records. Of these, over 725,000 represent felony-level warrants and over 3.8 million represent misdemeanor-level warrants.
- Twenty-two states and the District of Columbia indicate that local law enforcement agencies enter warrants onto the state warrant file.
- Five states (Hawaii, Massachusetts, North Carolina, Utah, and West Virginia), Guam, and Puerto Rico indicate that courts enter warrants onto the state file.
- In 14 states and the District of Columbia, entry onto the state file is made by both law enforcement and courts.
- In states without warrant files, 9 states report that law enforcement agencies enter warrants directly to NCIC.
- All states, American Samoa, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands enter warrant records into NCIC,

totaling over 2.1 million records as of December 31, 2014.

Flagging of records

Flagging of records, 2014 (table 6):

- Thirty-three states have felony flagging capability for all criminal history subjects.
- Nine states have felony flagging capability for some criminal history record subjects.
- Eight states, the District of Columbia, Guam, and Puerto Rico do not have a felony flagging capability for criminal history record subjects.
- States employ flagging to indicate:
 - a sex offender registrant (35 states and Guam)
 - a convicted drug offender (3 states—Kansas, Maryland, and South Carolina)
 - a violent offender (10 states)
 - a domestic violence conviction (12 states and Guam)
 - a mental health adjudication (5 states—Arkansas, California, Hawaii,

Illinois, and Massachusetts)

- DNA available (30 states)
- DNA not yet collected (10 states)
- a person ineligible for firearms purchases under Federal law (14 states and Guam)
- a person ineligible for firearms purchases under state law (10 states and Guam)

Accessibility of records and services through state repositories

Access to records, 2014 (table 6a):

- State repositories offer access to:
 - a sex offender registry (42 states, the District of Columbia, Guam, and Puerto Rico)
 - orders of protection (28 states, the District of Columbia, and Guam)
 - warrants and wanted persons information (32 states, the District of Columbia, and Guam)
 - retained applicant prints (22 states)

- rap back for criminal justice purposes (12 states)
- firearm registration information (7 states)
- domestic violence incident reports (6 states)

Dispositions

Number of final dispositions reported to state criminal history repository, 2008, 2010, 2012, and 2014 (table 7):

- Forty-eight states, the District of Columbia, Guam, and Puerto Rico provided data on the number of final dispositions reported to their criminal history repositories. They indicated that over 12.1 million final dispositions were reported in 2014—a 12% decrease from that reported in 2012.

Disposition reporting to the Federal Bureau of Investigation (FBI), 2014 (table 7a):

- In accordance with acceptable National Fingerprint File (NFF) practices, 14 NFF-participating states have elected not to send disposition information to the FBI on second and subsequent arrests.

- Twenty-nine states and Guam sent nearly 6.2 million final case dispositions to the FBI.
- Eighteen states sent 95% or more final case dispositions to the FBI via machine-readable data (MRD).
- Four states (Connecticut, Minnesota, New Mexico, and Virginia), the District of Columbia, and Guam sent 100% of final case dispositions to the FBI via hard copy or paper.
- Ten states sent 100% final case dispositions to the FBI via III message key.

Interim disposition reporting and posting of indictment information, 2014 (table 7b):

- Twenty-five states collect charge tracking information (interim dispositions) to show case status through the criminal justice process.
- Sixteen states and Guam post indictment information to the criminal history record.

Disposition reporting by local prosecutors, 2014 (table 7c):

Matching of dispositions between prosecutors and the repository, 2014 (table 7d):

- Thirty-four states, the District of Columbia, and Puerto Rico receive dispositions from local prosecutors.
- Seven states receive dispositions from local prosecutors via automated means.
- Seven states and Puerto Rico receive dispositions from local prosecutors via prosecutorial case management systems.
- Fifteen states receive dispositions in paper form.
- Eighteen states and the District of Columbia receive dispositions from local prosecutors via a mix of automated and paper-based processes.
- Twenty-one states match dispositions received from prosecutors through the assignment of a Process Control Number (PCN) or a Transaction Control Number (TCN) during booking and/or

subsequent to the arrest/booking process.

- Eleven states match dispositions received from prosecutors through a comparison of the State Identification Number (SID) and 12 states match dispositions by the Arrest Number.
- Nineteen states match dispositions received from prosecutors by the subject's name and date of birth, and 9 states match dispositions by charge.

Receipt of court disposition information by automated means and record matching, 2014 (table 8):

- Thirty-nine states and the District of Columbia receive court disposition data by automated means.
- Seventeen states report that 90% or more of all court dispositions are reported to repositories by automated means.
- Twenty-six states match dispositions received from courts through the assignment of a PCN or a TCN during booking and/or subsequent to the arrest/booking process.

- Twenty-one states and the District of Columbia match dispositions received from courts through a comparison of the SID, and 19 states and the District of Columbia match dispositions by the Arrest Number.
- Thirty-two states match dispositions received from courts by the subject's name and date of birth, and 16 states match dispositions by charge.

Matching of dispositions received to specific arrest events, 2014 (table 8a):

- Eight states report that 25% or more of all dispositions received could not be linked to a specific repository arrest record.
- Twenty-three states place dispositions that cannot be matched to a specific arrest into a suspense log for further investigation, and 13 states reject the disposition information.
- Repository staff in 28 states and Puerto Rico conducts follow-up actions when dispositions cannot be matched to a specific arrest. In 25 states and Puerto Rico, repository

staff follows-up and contacts the court to obtain additional information.

Record processing times, livescan devices in courtrooms, and disposition backlogs, 2014 (table 14)

- Forty states, the District of Columbia, and Guam report a total of over 3.3 million felony arrests in 2014.
- **Twenty** states reported having backlogs in entering court disposition data into their criminal history database.
- Collectively, **19** states have over 3 million unprocessed or partially processed court disposition forms, ranging from 200 **in North Dakota** to over 1 million in Nevada.
- The length of time between occurrence of the final felony court disposition and its receipt by the repository ranges from 1 day or less in **8** states and Guam to **164** days in Missouri.
- The number of days between receipt of a final felony court disposition and its entry into the criminal history

database ranges from 1 day or less in 20 states to over 100 days in Oregon.

- Ten states use livescan devices in the courtroom to link positive identifications with dispositions.

State criminal history repository practices and technologies employed

Arrest fingerprint cards processed, 2008, 2010, 2012, and 2014 (table 9):

- During 2014, over 11.6 million arrest fingerprint cards were submitted to state criminal history repositories. This is an 8% decrease from that reported in 2012.
- Twenty-one states report an overall increase in the total number of arrest fingerprint cards submitted to the state repository.
- Nine states report an overall increase of at least 10% in the total number of arrest fingerprint cards submitted to the state repository.

- Twenty-nine states report an overall decrease in the number of arrest fingerprint cards submitted to the state repository.

Criminal history system software employed by state repositories, 2014 (table 10):

- Software components of state criminal history systems:
 - Current system was acquired from a software vendor and configured for the state’s environment, but with no software modifications (2 states—New Hampshire and Wyoming—and Guam)
 - Current system was acquired from a software vendor, but customized changes were made to account for the state’s environment (19 states and the District of Columbia)
 - Current system was built in-house either by staff or contractors (26 states and Puerto Rico)

- Software environment / platform used for state criminal history systems:

- Microsoft.NET platform (9 states)
- Java platform (14 states, the District of Columbia, and Puerto Rico)
- Mainframe platform (11 states)
- Other (14 states and Guam)

Arrest/fingerprint reporting, 2014 (table 11):

- Forty-nine states, the District of Columbia, Guam, and Puerto Rico report having a total of 25,439 law enforcement agencies. Of these, over 10,000 law enforcement agencies submit arrest fingerprint images to state repositories using livescan technology.
- Over 400 law enforcement agencies submit arrest fingerprint images to state repositories using cardscan technology.
- Nearly 2,700 law enforcement agencies submit hard copy arrest fingerprint cards to state repositories.

Electronic fingerprint capture devices and the submission of arrest fingerprints, 2014 (table 11a):

- Forty-nine states, the District of Columbia, Guam, and Puerto Rico report receiving over 10.3 million arrest fingerprint records by livescan.
- Over 89,000 fingerprint records were scanned and submitted to repositories using cardscan, and over 591,000 hard copy arrest fingerprint cards were submitted and received from law enforcement.

Electronic fingerprint capture devices and the use of livescan/cardscan for criminal and noncriminal justice purposes, 2014, (table 11b):

- Forty-one states, the District of Columbia, Guam, and Puerto Rico report having 6,810 livescan devices and 500 cardscan devices in use for both criminal and noncriminal justice purposes. Similarly, 8,704 livescan devices and 168 cardscan devices are used exclusively for noncriminal justice purposes.

Electronic fingerprint capture devices and the submission of fingerprints for noncriminal justice purposes, 2014 (table 11c)

- Forty-three states, the District of Columbia and Puerto Rico report receiving over 10 million noncriminal justice fingerprint requests by livescan and over 627,000 by cardscan.
- Forty-three states, the District of Columbia, and Puerto Rico indicate over 80% of noncriminal justice fingerprints are submitted using livescan while 5% are submitted using cardscan.
- Four states and Guam indicate that all noncriminal justice fingerprints are submitted using other methods.

Mobile technology for capturing and transmitting fingerprints, 2014 (table 11d):

- Twenty-eight states, the District of Columbia, and Puerto Rico use mobile technology to transmit fingerprints for identification purposes.

- Four states use mobile technology to transmit fingerprints for booking purposes.
- Eight states and the District of Columbia plan to implement mobile technology to capture non-fingerprint biometric information.
- Twenty-four states employ Rapid ID and have conducted over 1.7 million searches that produced over 1 million “hits” or positive responses.

Record/database content and combining criminal events with noncriminal justice applicant information, 2014 (table 12):

- Twenty-five states and Puerto Rico combine both criminal events and noncriminal justice applicant information in the same record.
- Four states and Puerto Rico indicate that 30% or more of their records contain both criminal events and noncriminal justice applicant information.

Privatization of noncriminal justice fingerprint capture services, 2014 (table 13):

- Thirty-two states have privatized the capture of noncriminal justice fingerprints. In 18 of these states, a single vendor provides this service.
- In 30 states, the vendor assesses a fee above what the state charges for the background check. These fees range from \$8–\$20.

Noncriminal justice background checks

Noncriminal justice name-based background checks, 2014 (table 15):

- Forty-two states and the District of Columbia performed over 19.4 million name-based noncriminal justice background check requests.
- Twenty-nine states performed over 17.4 million name-based noncriminal justice background checks that were received via the Internet.
- Thirty-five states and the District of Columbia performed over 1.1 million name-based

noncriminal justice background checks that were received via the mail.

- Two states—Nevada and Oregon—received 112,700 name-based noncriminal justice background checks via telephone.
- Twelve states and the District of Columbia performed 732,100 additional name-based noncriminal justice background checks that were received via other means, such as modem or public walk-in access.

Noncriminal justice fingerprint-based background checks, 2014 (table 16):

- Information contained in the results of a fingerprint-based noncriminal justice background check:
 - Full record (39 states, the District of Columbia, Guam, and Puerto Rico)
 - Convictions only (3 states—Kentucky, Maine, and New Hampshire)
 - Juvenile records (5 states)

— Arrests without dispositions—over 1 year old (18 states and the District of Columbia)

— Other (20 states)

- Twenty-four states report that 10% or more fingerprint-based noncriminal justice transactions are identified against arrest fingerprints.
- Twenty-three states attempt to locate missing disposition information before responding to fingerprint-based noncriminal justice inquiries.

Legal authority for conducting noncriminal justice background checks, 2014 (table 17)

- All states, the District of Columbia, Guam, and Puerto Rico report having legal authority to conduct noncriminal justice background checks against a wide range of occupational groups, and licensing and regulatory functions. This authority is granted most often through specific state statute and where applicable, Federal statute pursuant to U.S. Public Law 92-544, the National Child Protection Act (NCPA),

and the Volunteers for Children Act (VCA). In instances where legal authority is not available, noncriminal justice background checks are not conducted. See table 17 for the specific circumstances under which these background checks are conducted.

Lights-out fingerprint processing, 2014 (table 18):

- Thirty-seven states, the District of Columbia, and Guam conduct “lights-out” fingerprint processing (an identification decision is made without fingerprint technician intervention).
- Twenty-one states and Guam report 60% or more of criminal and noncriminal fingerprints received are handled using “lights-out” processing techniques.

Assessment and allocation of fees, 2014 (table 19):

- All states, the District of Columbia, Guam, and Puerto Rico report charging a fee to conduct a search of the state’s criminal history database for noncriminal justice purposes.

- Fifteen states and the District of Columbia allocate all fees collected for such purposes to their state general fund.
- Three states (Georgia, New Jersey, and New York) allocate a percentage of collected fees to state repository operations.

- Twenty-one states and Guam allocate all fees collected for noncriminal justice background checks to their state repository.
- Eleven states and Puerto Rico allocate all fees to fund other activities/ programs. These include funding of Automated Fingerprint Identification Systems (AFIS), criminal justice information system support, information sharing activities, etc.

Web-based services for noncriminal justice purposes, 2014 (table 20):

- Twenty-seven states provide web-based noncriminal justice background checks to the public.

- Twenty-five states collect a public access fee to conduct a background check of Internet requests. Fees charged per inquiry range from \$1 in Missouri to \$31 in Maine.

Rap back

Criminal justice rap back services, 2014 (table 22)

- Eighteen states provide in-state criminal justice rap back services.
- At year’s-end 2014, no states were participating in the FBI’s Next Generation Identification (NGI) criminal justice rap back service.
- Nearly 59,000 in-state criminal justice rap back notifications were made by 10 states.
- Purposes in which criminal justice agencies can be notified of a subsequent inquiry and/or record posting via the in-state criminal justice rap back service:
 - Error correction/record management updates (6 states)
 - Investigative lead (1 state—Kansas)
 - Sex offender (2 states—Florida and New York)

- Parolee (5 states—Florida, Hawaii, Louisiana, New York, and Texas)
- Probationer (6 states)
- Permit/privileged license revocation (4 states—Connecticut, Delaware, Kansas, and Kentucky—and the District of Columbia)
- Noncriminal justice purpose fingerprint search (2 states—Connecticut and Florida)
- Other – criminal justice employment, arrests, CCW permit revocation, warrants, and record updates (8 states)

Noncriminal justice rap back services, 2014 (tables 23 and 23a)

- Twenty-seven states provide in-state noncriminal justice rap back services. In 25 of those states, rap back is authorized by state law or administrative regulation. In 19 states, state law or administrative regulation specifies the purposes in which agencies can be notified.

- Over 1.1 million in-state noncriminal justice rap back notifications were made by 16 states.
- At year’s-end 2014, no states were participating in the FBI’s NGI noncriminal justice rap back service.
- Occupational groups in which agencies can be notified for subsequent record postings:
 - Persons working with children (22 states)
 - Persons working with the elderly (19 states)
 - Healthcare providers (19 states)
 - Security guards (16 states)
 - Police, fire, and public safety personnel (19 states)
 - Other (16 states)
- Six states charge a fee for enrolling in the state’s noncriminal justice rap back service and 3 states charge a fee upon making a rap back notification. In Texas, fees are assessed for both enrollment and each notification.

- Ten states report having in-state noncriminal justice rap back validation requirements similar to that required by NGI for all or some of its rap back subscriptions.

Data tables

Table 1. Overview of state criminal history record systems, December 31, 2014

State	Number of subjects (individual offenders) in state criminal history file			Percent of arrests in database that have final case dispositions recorded		
	Total	Automated	Manual	All arrests	Arrests within past 5 years	Felony charges with final disposition
Total	105,569,200 ^a	100,024,400	5,544,800			
Alabama	2,164,900	2,164,900	0	na	20	na
Alaska	270,400	260,200	10,200	91	91	92

Table 1 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).
- The "number of subjects (individual offenders)" in the state criminal history file for each year applies only to the criminal history file, including partially automated files, and does *not* include release by police without charging, declinations to proceed by prosecutor, or final trial court dispositions.
- The total number of subjects (individual offenders) in state criminal history files does not include American Samoa, the Northern Mariana Islands, the Virgin Islands, and Wisconsin, from which no data were submitted.

Data footnotes:

- a. The total number of subjects in state criminal history files does not equal the sum of automated and manual files due to rounding.
- b. Massachusetts Courts do not submit fingerprint-supported final dispositions to the repository. A major project is currently underway to link court disposition data to the repository.
- c. Low percentages are due to a number of factors. Lack of training of court clerks, turnover, illegible handwriting on manual documents, court information system not linked to criminal history repository system, updated records at local level are not being forwarded to repository system, etc.
- d. Wisconsin's DOJ IT personnel were unable to provide this data within the timeframe requested.

Table 1a. Overview of state criminal history record system functions, 2014

State	Total number of fingerprints processed	Total criminal justice purposes	Fingerprints processed for criminal justice purposes				Total noncriminal justice purposes	Fingerprints processed for noncriminal justice purposes			
			Retained	Percent of 2014 volume	Not retained	Percent of 2014 volume		Retained	Percent of 2014 volume	Not retained	Percent of 2014 volume
Total	23,886,000 a	11,687,700	11,286,800		400,900		12,198,500	8,434,000		3,764,500

Table 1a explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).
- The total number of fingerprint-based background checks in state criminal history files does not include American Samoa, the Northern Mariana Islands, and the Virgin Islands, from which no data were submitted.

Data footnotes:

- a. The total number of fingerprints processed does not equal the sum of fingerprints processed for criminal and noncriminal justice purposes due to rounding.

Table 2. Number of subjects (individual offenders) in state criminal history file, 2010, 2012, and 2014

State	Number of subjects in manual and automated files		Number of subjects in manual and automated files, 2014			Percent of automated files			Percent change in total file

Table 2 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).
- The totals for the percent of automated files and the percent change in total files represent percentages of column totals, not averages.
- The total number of subjects in manual and automated state criminal history files for 2014 does not include American Samoa, the Northern Mariana Islands, the Virgin Islands, and Wisconsin, from which no data were submitted.
- The "number of subjects (individual offenders)" in the state criminal history file for each year applies only to the criminal history file, including partially automated files, and does not include the master name index.

Data footnotes:

- a. 2012 totals were overstated by including applicant retained fingerprint cards. This total was adjusted from 4,053,000 to 2,967,900 in this year's report.
- b. The decrease between 2010 and 2012 totals is from adjusting how law enforcement applicants and other retained applicant fingerprint cards are accounted for in the state database. Additionally, 90,310 records were expunged from state files in 2012.
- c. Wisconsin's DOJ IT personnel were unable to provide this data within the timeframe requested.

Table 3 explanatory notes:

- na (not available).
- nr (not reported).

Data footnotes:

- a. Images maintained together (facial, mug shots, scars, marks, tattoos, etc.).
- b. Numbers represent counts as of April 2015.
- c. Biometric and image date is collected by the repository but volumes for this report are not available.
- d. Footprints
- e. Latent prints include those entered by NVDPS and remote AFIS processing sites. Other = 10-digit rolled for criminal and civil.

Table 4 explanatory notes:

- na (not available).
- nr (not reported).

Data footnotes:

- a. At year's end 2014, 25 protection orders were entered to NCIC. Nevada courts are not 24x7. This causes courts not to be able to comply with longstanding NCIC policy requiring "hits" against NCIC records to be confirmed by the entering agency 24x7. Also, courts and law enforcement are not available or willing to validate the accuracy of protection orders under the existing NCIC validation requirement. Protection orders that meet NICS entry criteria are entered to the NICS Index by repository staff for use in making firearm suitability determinations.

Table 7 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).
- Final dispositions include release by police without charging, declination to proceed by prosecutor, or final trial court disposition.

Data footnotes:

- a. Final dispositions reported in 2008 and 2010 include dispositions in backlog. The 2012 total does not.
- b. The 2012 increase in reported dispositions is caused by efforts to enter case dismissals that are reported to the repository by statewide courts. This also influences the 2014 percent change notation.
- c. The 2014 increase in reported dispositions is caused by a change in counting methodologies from previous cycles. The current method is to count each charge within each arrest event, as opposed to only counting individual arrest events and not each charge.
- d. The 2012 increase in reported dispositions is caused by efforts to complete a backlog reduction project.
- e. The 2014 decrease in reported dispositions is caused by a legislative change that required courts to electronically report dispositions to the repository by July 1, 2013. Prior to that date, statewide prosecutors reported dispositions; however, on the effective date of the new law, courts were not ready to report dispositions and prosecutors discontinued reporting. Prosecutors have since begun to report again and work is being done to build electronic court exchanges to report dispositions to the repository.
- f. The 2012 increase in reported dispositions is caused by NCHIP- and NARIP-funded efforts to research and enter dispositions for charges for which final dispositions were not reported.
- g. The 2014 decrease in disposition receipts is caused by the clearing of a 2012 backlog of disposition reports.
- h. The 2012 decrease in reported dispositions is caused by completing a 2010 project with statewide courts to recover past "legacy" disposition data.
- i. The Commonwealth of Massachusetts has a separate disposition database. Currently these dispositions are not submitted to the repository. Massachusetts reports 99% of records in its database have dispositions.
- j. The 2012 increase in reported dispositions is caused by efforts to research and enter dispositions for charges for which final dispositions were not reported. The 2014 decrease follows a 2013 legislative change making deferrals nonpublic and not subject to reporting of same to the repository.
- k. In the 2008 survey, Minnesota reported 230,100 final dispositions. This total was overstated by 63,900 and adjusted in this report to total 166,200.
- l. The 2014 increase in reported dispositions is caused by a major educational outreach project with statewide courts.
- m. The 2014 increase in reported dispositions is caused by a major outreach project and backlog reduction effort following a fall 2013 audit of criminal history records between the repository and statewide courts.
- n. The 2012 increase in reported dispositions is caused by implementing an automated linking and flagging process between the New Jersey State Police and statewide courts. This process went into production in 2011 and stabilized following a backlog reduction effort in 2013 and 2014.
- o. The 2012 and 2014 decreases in reported dispositions are caused by completing a backlog reduction project.
- p. Ohio's 2010 total number of final case dispositions received was decreased from 770,900 to 575,100 in this year's report. Also, the 2008–2010 percent change figure was adjusted to reflect this change. The higher number included dispositions that were processed from an accumulated backlog.
- q. Oregon's 2012 total number of final case dispositions received was decreased from 202,500 to 149,400 in this year's report. Also, the 2010–2012 percent change figure was adjusted to reflect this change. The 2014 decrease in reported dispositions is caused by a change in counting methodologies from previous cycles.
- r. The 2012 increase in reported dispositions is a result of receiving electronic dispositions from statewide county prosecutors.

Table 7a. Disposition reporting to the Federal Bureau of Investigation (FBI), 2014

Of dispositions sent to the FBI, percent sent by:

State	Of total dispositions received, number sent to the FBI	Of dispositions sent to the FBI, percent sent by:			Interstate Identification Index (III) Message Key	NFF-participating states electing <u>not</u> to send disposition information to FBI on second and subsequent arrests

Table 7a explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).

NOTE: National Fingerprint File (NFF) states are signatories to the National Crime Prevention and Privacy Compact, under which these states have agreed to provide all criminal history information when responding to requests received from the FBI in connection with national civil purpose background checks. Consequently, disposition information is made available for all inquiries received from the FBI for arrests that occurred subsequent to the state becoming an NFF participant. In some instances, an NFF state may provide information that predates NFF participation. States that do not participate in the NFF program continue to voluntarily forward disposition information to the FBI.

Data footnotes:

- a. NFF-participating state.
- b. The repository sends dispositions to the FBI when requested for specific cases.
- c. A project to send disposition information to the FBI is underway. It began in 2015 and it includes dispositions received by the repository in previous years.
- d. The Virginia State Police is redesigning its criminal history system to include sending disposition

Table 7b. Interim disposition reporting and posting of indictment information, 2014

Table 7b explanatory notes:

- na (not available).
- nr (not reported).

Data footnotes:

- a. Arkansas rarely uses indictments. Instead, a criminal information is filed, which starts the criminal proceeding. Information obtained about the person and arrest and status of the criminal proceeding are posted to the record as received.
- b. Indicted disposition entered at the discretion of the prosecutor.
- c. Indictment information is posted to the criminal history record once the offender is served the warrant and booked.

Table 8a explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- na (not available).
- nr (not reported).

Data footnotes:

- a. Known information is added and flagged to indicate the information is not fingerprint supported.
- b. Added to repository as an "orphan disposition".
- c. Placed in a temporary file for later processing and matching to arrests.
- d. Disposition is entered to CCH without arrest information.
- e. BCI contacts law enforcement for follow-up with court.
- f. Placed in a suspense file and checked daily for arrest.
- g. Arresting law enforcement agency is contacted.
- h. Arresting law enforcement agency is contacted.

Table 9. Arrest fingerprint cards processed, 2008, 2010, 2012, and 2014

State	Fingerprints processed for criminal justice purposes				Percent change		
	2008	2010	2012	2014	2008-2010	2010-2012	2012-2014

Table 9 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).

Data footnotes:

- a. 2012 totals were understated, causing the 2012-2014 percent change increase.
- b. The 2012 increase of fingerprint card submissions to the repository is caused by an increase of misdemeanor offenses submitted by large municipal police agencies throughout the state.

Table 10 explanatory notes:

- na (not available).
- nr (not reported).

Legend: Software components of state criminal history systems

1. Acquired from software vendor and configured for the state's environment, but with no software modifications.
2. Acquired from software vendor but customized changes were made to account for the state's environment.
3. Built in-house either by staff or contractors.
4. Other.

Data footnotes:

- a. PL/SQL on Oracle 11G, Linux OS on Dell servers.
- b. Omnixx Enterprise Platform that incorporates BixTalk servers. Datamaxx message switch and SQL servers.
- c. Oracle forms and reports.
- d. Oracle software.
- e. Microsoft Visual Basic 6 with COM+ components.
- f. Sequel servers.
- g. PL / SQL.
- h. Microsystem cluster with multiple languages (C++, COBOL, PL/I, SQL).
- i. Oracle 11g database/Oracle 10g GUI on Windows platform.
- j. Access.
- k. Oracle.
- l. Progress.
- m. C++.
- n. CRIMEvue is on a Windows 2003 platform using mostly C++ code. Moving to either Windows 2008R2 or Windows 2012 this summer. The data is stored on a Microsoft SQL Server 2005 database.
- o. Oracle forms.

Table 11. Arrest/fingerprint reporting, 2014

State	Total number of law enforcement agencies	Number of law enforcement agencies that submit arrest prints via livenesscan	Percentage of arrest prints submitted via livenesscan	Number of agencies that submit arrest fingerprints via cardscan	Number of agencies that submit hard copy arrest fingerprint cards	Number of felony arrests reported to the repository

Table 13 explanatory notes:

- na (not available).
- nr (not reported).
- Fees charged have been rounded to the nearest dollar.

Data footnotes:

Additional vendor-provided services:

- a. Fees are set between the agency contracting the vendor for this service. Sending responses back to the requester.
- b. In at least one case, the vendor delivers the fingerprint cards to the repository for processing.
- c. Electronic application form and fee collection.
- d. No additional services beyond taking prints is authorized.
- e. Vendors collect and remit license/cert/permit fees to the California Department of Justice.
- f. Private vendors do not receive CHRI. Results go directly to the noncriminal justice entity.
- g. 3M Cogent provides customized website registration, and electronically captures and submits applicant fingerprints to GCIC.
- h. Some do fingerprint capture only, while others transmit the prints electronically to the repository on behalf of the authorized agency.
- i. Sending responses back to the requester.
- j. Sends responses back. Collects fees. Schedules the capturing.
- k. Hosting website for response review.
- l. Fee collection.
- m. None
- n. None
- o. None
- p. Results are sent back to a portal for review by the requesting agency.
- q. Verification of identification documents, photo capture, and transmission.
- r. Evaluating responses for the requester, sending responses back to the requester.
- s. Fingerprint capture and transmit only.
- t. Sends responses to authorized recipient.
- u. None
- v. Fee collection.
- w. None
- x. Fieldprint & L1 vendors (out-of-state store and forward) set appointments, provide fee collection, tracking, and reports for state agencies.
- y. Mails responses back to requester.
- z. Sends responses to requesters.

Table 14. Record processing times, livescan devices in courtrooms, and disposition backlogs, 2014

State	Number of felony arrests reported to repository during calendar year 2014	Average number of days between occurrence of final felony trial court case disposition and receipt of data by repository	Average number of days between receipt of final felony court disposition and entry of data into criminal history database	Livescan devices used in the courtroom to link positive identifications with dispositions	Number of livescan devices in courtrooms	Backlog of entering court disposition data into criminal history database (i.e., not entered within 48 hours of receipt at repository)	Number of unprocessed or partially processed court dispositions

Survey of State Criminal History Information Systems, 2014

Since 1989, the *Survey of State Criminal History Information Systems* has been used to collect the nation's most complete, comprehensive and relevant data on the number and status of state-maintained criminal history records and on the increasing number of operations and services involving noncriminal justice background checks provided by the state repositories. This data collection is supported by Cooperative Agreement No. 2011-MU-MU-K054 awarded by the Bureau of Justice Statistics, Office of Justice Programs, U.S. Department of Justice. As in previous years, response to this survey is voluntary.

Respondents using the online survey tool, accessible at <http://www.search.org/surveys/repository/>, to enter 2014 data can view previously submitted 2012 data for comparison purposes. Where applicable, your state's 2012 responses are displayed in color within each section of the online survey. It is hoped that this information will assist respondents in completing the survey more accurately and efficiently. **The password to gain access to your state's online survey is provided in the cover letter.** If you have any questions or comments, please contact SEARCH staff Dennis DeBacco at 916-392-2550 ext. 325, email dennis@search.org.

If more convenient, you may print the survey sections, complete them manually, and fax (916-392-8440) or mail them to the attention of Dennis DeBacco at SEARCH, 7311 Greenhaven Drive, Suite 270, Sacramento, CA 95831. **The deadline for survey submission is April 30, 2015.**

The survey is divided into 6 sections, each of which may be submitted independently and not necessarily in the order presented. This was done so that different people on each repository's staff may submit the data for which they are responsible. **Repository directors are responsible to see that the survey is submitted in its entirety.** Please note the following:

1. All reported data should be for calendar year 2014, or as of December 31, 2014.
2. The term "felony" includes any crime classified as a felony under your state's laws. These offenses are generally punishable by a term of incarceration in excess of one year. If your state's laws do not use the term "felony," please substitute functional equivalents, such as class 1, 2, 3 and 4 offenses in New Jersey and class A, B and C offenses in Maine.
3. Questions that seek responses based on a "legal requirement" refer *only* to a *state statute* or a *state administrative regulation having the force of law*.
4. If additional space is needed, please use the "Additional Comments" area at the end of each section.
5. Please use the "Additional Comments" area at the end of each section to identify questions for which "no data is available" and to describe significant changes between the current response and data reported in the 2012 survey.
6. If a question is not applicable to your repository, please indicate "NA" in the "Additional Comments" area at the end of each section.

Burden Statement

Under the Paperwork Reduction Act, we cannot ask you to respond to a collection of information unless it displays a currently valid OMB control number. The survey will be sent to criminal history repositories in 56 jurisdictions, including the 50 States, the District of Columbia, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico and the U.S. Virgin Islands. The average time required for each agency to complete the survey is estimated at **6.3** hours. Send comments regarding this burden estimate or any aspect of this survey, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington DC 20531. Do not send your completed form to this address.

SECTION I: REPOSITORY

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

The following questions relate to descriptions of your state's criminal history record information and master name index databases:

1. How many subjects (individual criminal offenders) were in your criminal history file as of December 31, 2014? **Tables 1 and 2**
 - (a) Automated records _____ (include subjects whose records are partially automated)
 - (b) Manual records _____
 - (c) Total records _____

2. Fingerprints processed in 2014: **Tables 1a and 9**

<u>Purpose</u>	<u>Number</u>	<u>Percentage of 2014 volume</u>	<u>Totals</u>
(a) Criminal (retained)	_____	_____ %	
(b) Criminal (not retained)	_____	_____ %	(a+b) _____
(c) Noncriminal (retained)	_____	_____ %	
(d) Noncriminal (not retained)	_____	_____ %	(c+d) _____
(e) What was the <u>total number</u> of fingerprint-based background checks conducted during 2014?			(a+b+c+d) _____

3. (a) Does your state combine both criminal events and noncriminal justice applicant information in the same record? **Table 12**
- Yes No
- (b) Of the total records in your database, _____ % represent records that contain both criminal events and noncriminal justice applicant information.
4. (a) Do you have felony conviction flagging, i.e., does your criminal history record database include a data field or flag enabling you to quickly determine whether a given record subject has a felony conviction? **Table 6**
- Yes, all subjects with felony convictions
 Yes, some subjects with felony convictions
 No
- (b) Do you employ flagging to indicate? (Check all that apply.)
- Ineligible to purchase firearms
 Sex offender registrant
 Convicted drug offender
 Violent offender
 Domestic violence conviction
 Mental health adjudication
 DNA available
 DNA not yet collected
 IFFS, indicating ineligible for firearms purchase under federal law
 IFFS, indicating ineligible for firearms purchase under state law
 Other (describe) _____

The following questions refer to repository administration, procedures and practices.

5. (a) As of December 31, 2014, did your repository conduct “lights out” processing of fingerprints (an identification decision is made without fingerprint technician intervention)? **Table 18**
- Yes No
- (b) If yes, what percentage of fingerprints was handled with “lights out” processing? _____ %
- (c) If yes, what percentage of criminal fingerprints was handled with “lights out” processing? _____ %
- (d) If yes, what percentage of noncriminal applicant fingerprints was handled with “lights out” processing? _____ %
6. (a) Does your state maintain a protection order file? **Table 4**
- Yes No

(b) If yes, which agency(s) enter protection orders onto the state file?
(Check all that apply.)

- Law enforcement
- Courts
- Other (describe) _____

(c) If yes, how many active records were in the state protection order record database as of December 31, 2014?
_____ records

(d) Are protection orders entered onto the FBI-NCIC Protection Order File?

- Yes
- No

(e) If yes, which agency(s) enter protection order information to the FBI-NCIC Protection Order File? (Check all that apply.)

- Law enforcement
- Courts
- Other (describe) _____

7. (a) Does your state maintain a warrant file? **Table 5**

- Yes
- No

(b) If yes, which agency(s) enter warrants onto the state file? (Check all that apply.)

- Law enforcement
- Courts
- Other (describe) _____

(c) If yes, how many records were in the state warrant database as of December 31, 2014?
_____ records **Table 5a**

(d) Of this total, indicate the number of:

Felony warrants _____
Misdemeanor warrants _____
Other (explain) _____

(e) Which agency(s) enter warrant information to the FBI-NCIC Wanted Person File?
(Check all that apply.) **Table 5**

- Law enforcement
- Courts
- Other (describe) _____

8. In addition to criminal history information, to what other records does your state's repository provide access? (Check all that apply.) **Table 6a**

- Sex offender registry
- Orders of protection
- Wanted persons/warrants
- Retained applicant prints
- Rap back services for criminal justice purposes
- Firearm registration
- Domestic violence incident reports
- Other (specify) _____

9. (a) Which of the following most accurately describes the software components of your criminal history system? **Table 10**

- Acquired from a software vendor and configured for the state's environment, but with no software modifications
- Acquired from a software vendor, but software changes were necessary to customize for the state's environment
- Built in-house (either by staff or contractors), such that the state's system is unique for our state
- Other (specify) _____

(b) Which of the following most accurately describes the software environment or platform used for your criminal history system?

- Microsoft .NET platform
- Java platform
- Mainframe platform (e.g., COBOL, Natural, PL/I, etc.)
- Other (specify) _____

SECTION II: ARREST/FINGERPRINT REPORTING AND ENTRY

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

1. How many felony arrests were reported to your repository during calendar year 2014?
 _____ arrests **Tables 11 and 14**

2. How many arrest fingerprints were submitted to your repository during 2014? (a+b+c = d)
 - (a) _____ via livescan **Table 11a**
 - (b) _____ via cardscan
 - (c) _____ hard copy fingerprints
 - (d) _____ total arrest fingerprints

3. What types of biometric information are currently utilized in identification search processes conducted by your agency? (Check all that apply, and indicate volume.)

<input type="checkbox"/> Latent fingerprints Table 3	_____ 2014 volume
<input type="checkbox"/> Flat prints	_____ 2014 volume
<input type="checkbox"/> 2-finger prints for identification purposes	_____ 2014 volume
<input type="checkbox"/> 2-finger prints for updating incarceration or release information to criminal history	_____ 2014 volume
<input type="checkbox"/> 10-finger prints for updating incarceration or release information to criminal history	_____ 2014 volume
<input type="checkbox"/> Palm prints	_____ 2014 volume
<input type="checkbox"/> Facial images/mug shots	_____ 2014 volume
<input type="checkbox"/> Scars, marks, and tattoo images	_____ 2014 volume
<input type="checkbox"/> Facial recognition data	_____ 2014 volume
<input type="checkbox"/> 1- or 2-finger prints for updating disposition information	_____ 2014 volume
<input type="checkbox"/> Iris capture	_____ 2014 volume
<input type="checkbox"/> Other (specify) _____	_____ 2014 volume

4. (a) Are you using mobile technology to transmit fingerprints for identification purposes?
 Yes No **Table 11d**
- (b) Are you using mobile technology to transmit fingerprints for booking purposes?
 Yes No
- (c) Do you have plans to implement mobile technology that captures non-fingerprint biometric information?
 Yes No
- (d) Is your state employing Rapid ID?
 Yes No

Number of searches conducted in 2014 _____

Number of hits in 2014 _____

5. (a) Total number of law enforcement agencies in your state _____ **Table 11**
- (b) Number of law enforcement agencies that submit arrest prints via livescan (including agencies without livescan devices that receive livescan services from agencies that do have that equipment, such as a sheriff that provides booking services for multiple local police departments) _____
- (c) Number of agencies that submit arrest fingerprints via cardscan _____
- (d) Number of agencies that submit hard copy arrest fingerprint cards _____
- (e) Percentage of arrest prints submitted via livescan during 2014 _____%

ADDITIONAL COMMENTS:

SECTION III: DISPOSITIONS

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

The following questions seek to determine to what extent the records in your criminal history record database contain final case disposition information. (“Final case disposition” is defined as release by police after charging; decline to proceed by prosecutor; or final trial court disposition.)

1. If you are a National Fingerprint File (NFF) state, have you elected not to forward disposition information on second and subsequent arrests to the FBI? **Table 7a**
 Yes No N/A (Not an NFF participant)

2. Does your state collect charge tracking information (sometimes referred to as “interim disposition information”) on the criminal history record showing the status of a case as it moves through the justice system? (E.g., reporting of an indictment, charges filed that are different than arrest charges, etc.) **Table 7b**
 Yes No

3. (a) How many final case dispositions did your repository receive during 2014? **Table 7** _____ dispositions

(b) Of those, how many were sent to the FBI? **Table 7a** _____ dispositions

Of the dispositions forwarded to the FBI:

- (c) What percentage was sent by Machine Readable Data (MRD) such as tape/CD/DVD? _____ %
- (d) What percentage was sent via hard copy/paper? _____ %
- (e) What percentage was sent by Interstate Identification Index (III) message key? _____ %

4. What percentage of all arrests in the criminal history database have final case dispositions recorded? **Table 1**
- (a) Arrests entered within past 5 years _____ %
- (b) Arrests in the entire database _____ %
- (c) Felony charges _____ %
5. (a) Of the dispositions received at the repository during 2014, what percentage could not be linked to a specific arrest record, either because of failed matching criteria or the arrest had not been reported to the repository? **Table 8a** _____ %
- (b) When a disposition cannot be matched, the following action(s) is taken: (Check all that apply.)
- Placed in a suspense file (no further action)
 - Placed in a suspense file for further investigation
 - Disposition information is rejected
 - Follow-up actions are taken by repository staff
 - Court is contacted
 - Other _____
6. (a) As of December 31, 2014, was any court disposition data reported directly to the repository by automated means? (Note: “automated” means a method by which data is transmitted by the court to the repository where it is matched against criminal history records and entered on the criminal history record, usually without manual intervention. This does not include dispositions received via fax or email, which require manual activity for criminal history record matching and data entry.) **Table 8**
- Yes No
- (b) If yes, what percentage of dispositions was reported in 2014 by automated means?
_____ %
- (c) How are records matched between the court system and the repository? (Check all that apply.)
- Process Control Number (PCN) or Transaction Control Number (TCN) assigned when fingerprints were taken at time of arrest/booking
 - PCN or TCN assigned subsequent to arrest/booking
 - State Identification Number
 - Arrest Number
 - Name
 - Date of birth
 - Charges

- N/A. My state does not receive automated disposition information from courts
- Other (please explain)_____

7. In 2014, what was the average time elapsed between the occurrence of final felony trial court case dispositions and receipt of information concerning such dispositions by the repository? **Table 14**

_____ Days

8. In 2014, what was the average time elapsed between receipt of final felony trial court disposition information by the repository and entry of that information into the criminal history record database? **Table 14**

_____ Days

9. (a) As of December 31, 2014, was your state using any livescan devices in courtrooms/courthouses to link positive identifications with dispositions? **Table 14**

- Yes
- No

(b) If yes, how many livescan devices are in courtrooms/courthouses?

_____ Devices

10. (a) As of December 31, 2014, was there a backlog of court disposition data to be entered into the criminal history record database (i.e., not entered within 48 hours of receipt at repository, including dispositions that could not be matched to a criminal history record within 48 hours of receipt at the repository)? **Table 14**

- Yes
- No

(b) If yes, how many unprocessed or partially processed court case dispositions did you have?

11. (a) Does the repository receive any final case disposition information (e.g., decline to proceed) from local prosecutors or a statewide prosecutors association? **Table 7c**

- Yes
- No

(b) If yes, this information is: (Check all that apply.)

- Received via automated means
- Received via the prosecutor's case management system
- Paper-based
- A mix of automated and paper-based

(c) If yes, how are records matched between prosecutors and the repository? (Check all that apply.) **Table 7d**

- N/A. My state does not receive automated disposition information from prosecutors
- Process Control Number (PCN) or Transaction Control Number (TCN) assigned when fingerprints were taken at time of arrest/booking
- PCN or TCN assigned subsequent to arrest/booking
- State Identification Number
- Arrest Number
- Name
- Date of birth
- Charges
- Other (please explain) _____

12. Does your state post indictment information to the criminal history record? **Table 7b**

- Yes
- No

ADDITIONAL COMMENTS:

SECTION IV: NONCRIMINAL BACKGROUND CHECKS

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

BACKGROUND CHECKS

1. (a) Does your state charge a fee to conduct a search of the criminal history record database for noncriminal justice purposes? **Table 19**

- Yes No

(b) If yes, how are fees allocated?

- All fees go to the state general fund, with repository funded by general fund allotment
- A percentage of fees go to support repository operations _____ %
- All fees go to support repository operations
- Other _____

2. Please indicate the legal authority your state uses for each of the following background checks. (Check all that apply.) **Table 17**

	N/A (state does not do these checks)	State check only	PL 92-544 statute	NCPA/VCA
Daycare providers				
Caregivers—residential facilities				
School teachers				
Non-teaching school personnel (including volunteers)				
Volunteers working with children				
Prospective foster care parents				
Prospective adoptive parents				
Relative caregivers				
Nurses/Elder caregivers				
Legal guardians				
Hazardous materials licensees				N/A
Medical marijuana (dispensers, caregivers)				N/A

FINGERPRINT-BASED SEARCHES

3. (a) Has your state privatized the taking of fingerprints for noncriminal justice purposes?

- Yes No **Table 13**

(b) Is this service provided by?

- A single vendor Multiple vendors

(c) Does the vendor(s) assess a fee above what the state charges to perform the background check?

- Yes, Fee \$ _____ No

(d) Does the vendor provide any additional services besides the fingerprint capture? (e.g., evaluating responses for the requestor, sending responses back to the requestor, etc.)

4. (a) Total number of noncriminal justice fingerprints submitted to the repository via liveness during 2014 **Table 11c** _____

(b) Total number of noncriminal justice fingerprints submitted to the repository via cardscan during 2014 _____

(c) Percentage of noncriminal justice fingerprints submitted via liveness during 2014 _____

(d) Percentage of noncriminal justice fingerprints submitted via cardscan during 2014 _____

(e) Total number of liveness devices available for noncriminal justice purposes only **Table 11b** _____

(f) Total number of cardscan devices available for noncriminal justice purposes only _____

(g) Total number of liveness devices used for both criminal and noncriminal justice purposes _____

(h) Total number of cardscan devices used for both criminal and noncriminal justice purposes _____

5. What information is contained in the results for fingerprint-based noncriminal justice background checks? (Check all that apply.) **Table 16**

- Full record
- Convictions only
- Juvenile records
- Arrests without disposition—over 1 year old
- Other _____

6. What percentage of fingerprint-based noncriminal justice transactions are identified against arrest fingerprints? **Table 16**
 _____ %
7. Does the repository attempt to locate missing disposition information before responding to a fingerprint-based noncriminal justice inquiry? **Table 16**
 Yes No

NAME-BASED SEARCHES

8. How many name-based noncriminal justice background checks were performed in 2014? (a+b+c+d = e) **Table 15**
- (a) Received via Internet _____
- (b) Received via mail _____
- (c) Received via telephone _____
- (d) Other _____
- (e) Total _____

INTERNET ACCESS

9. Does your repository provide web-based noncriminal justice background checks to the public? **Table 20**
 Yes No
10. Are fees involved for Internet access for the general public (not including any registration or account fees)? **Table 20**
 Yes, Fee \$ _____ No

ADDITIONAL COMMENTS:

SECTION V: CRIMINAL JUSTICE RAP BACK SERVICES

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

1. Does your state currently provide an in-state criminal justice rap back service?

- Yes No **Table 22**

If you answered "No," skip to question 4.

2. What are the purposes in which criminal justice agencies can be notified of a subsequent inquiry and/or record posting via your in-state criminal justice rap back service? (Check all that apply.) **Table 22**

- Error correction/record management update
- Investigative lead
- Sex offender
- Parolee
- Probationer
- Permit/privileged license revocation (i.e., CCW permit, gaming work card, etc.)
- Noncriminal justice purpose fingerprint search
- Other (describe) _____

3. In 2014, how many in-state criminal justice rap back notifications were made to agencies for criminal justice purposes? **Table 22**

4. Do you currently participate in the FBI's Next Generation Identification (NGI) rap back service for criminal justice purposes? **Table 22**

- Yes No

If you answered "No," skip questions 5 through 7.

5. As a participant in NGI's rap back service, do you allow criminal justice agencies in your state to subscribe to the following supervision populations in NGI, as described in the *NGI Rap Back Criminal Justice Policy and Implementation Guide*? (Check all that apply.) **[No table]**
- Sex offenders
 - Parolees
 - Probationers
 - Other supervised persons (describe) _____
 - Uncertain
6. As a participant in NGI's rap back service, do you allow law enforcement agencies in your state to create law enforcement investigative subscriptions in NGI, as described in the *NGI Rap Back Criminal Justice Policy and Implementation Guide*? **[No table]**
- Yes No Uncertain
7. As a participant in NGI's rap back service, do you plan to: (Select one.) **[No table]**
- Keep your in-state criminal justice rap back service
 - Keep your in-state criminal justice rap back service *and* allow enrollment in NGI
 - Retire your in-state criminal justice rap back service and use NGI for both in-state and national rap back services
 - Uncertain
 - My state does not provide an in-state criminal justice rap back service

ADDITIONAL COMMENTS:

SECTION VI: NONCRIMINAL JUSTICE RAP BACK SERVICES

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

Note: Questions 1–7 apply to in-state rap back programs for noncriminal justice purposes.

1. Does your state currently provide an in-state noncriminal justice rap back service?
 Yes No **Table 23**

If you answered “No,” skip to question 8.

2. (a) Is your in-state noncriminal justice rap back service authorized by state law or administrative regulation? **Table 23**

Yes No

(b) If yes, does the state law or administrative regulation specify the purposes in which noncriminal justice agencies can be notified of a subsequent inquiry and/or record posting?

Yes No

3. Does your in-state noncriminal justice rap back service have a subscription validation process similar to that required for NGI rap back participation, as described in the *NGI Rap Back Noncriminal Justice Policy and Implementation Guide*? **Table 23a**

Yes, for all subscription populations
 Yes, for some subscription populations
 No

4. What are the occupational groups in which noncriminal justice agencies can be notified of a subsequent record posting? (Check all that apply.) **Table 23**

Individuals working with children
 Individuals working with the elderly

- Individuals providing healthcare
- Security guards
- Police, fire, public safety
- Other (describe) _____

5. In 2014, how many in-state noncriminal justice rap back notifications were made to agencies for noncriminal justice purposes? **Table 23a**

6. Does your in-state noncriminal justice rap back service impose a fee to enroll a subject's fingerprints for a prescribed period of time? **Table 23a**

- Yes \$ _____
- No

7. Does your in-state noncriminal justice rap back service impose a fee for noncriminal justice rap back notifications? **Table 23a**

- Yes \$ _____
- No

8. Do you currently participate in NGI's rap back service for noncriminal justice purposes? **Table 23a**

- Yes No

If you answered "No," skip questions 9 through 10(d).

9. As a participant in NGI's rap back service, does your state restrict NGI subscribers from selecting from any of the available fees and their associated subscription terms? **[No table]**

- Yes, we limit NGI subscribers in our state to the following: (Select all that apply.)
 - Two-year – \$2.25
 - Five-year – \$6.00
 - Lifetime – \$13.00
- No, our subscribers can choose from any of the three fees and their associated subscription terms for their populations
- Yes, we limit our subscribers to using *only* the Lifetime fee (\$13.00) and subscription term
- Yes, we limit our subscriber's choice of fees in a different manner (describe) _____

10. As a participant in NGI's rap back service— **[No table]**

(a) Do you plan to: (Select one.)

- Keep your in-state noncriminal justice rap back service
- Keep your in-state noncriminal justice rap back service *and* allow enrollment in NGI
- Retire your in-state noncriminal justice rap back service and use NGI for both in-state and national rap back services
- Uncertain
- My state does not provide an in-state noncriminal justice rap back service

(b) Do you restrict the Privacy Risk Mitigation Strategies that your subscribers can choose?

- Yes, we limit the Privacy Risk Mitigation Strategy choices to the following: (Check all that apply.)
 - Pre-notification with mandatory validation/expiration within 3 years
 - Authority for duration of a license
 - Statutory authority for a set period of time
 - One-year validation/expiration
 - Subscription synchronization through automated or formalized procedures
- No, we will allow the subscribers to choose any of the Privacy Risk Mitigation Strategies
- Not certain

(c) Do you restrict the Triggering Events that your subscribers may choose for future NGI Rap Back Activity Notifications?

- Yes, we currently restrict, or plan to restrict, the Triggering Event choices to the following: (Check all that apply.)
 - Criminal Retain Submission
 - Dispositions
 - Expunge/Partial Expungement
 - Warrant entry with FBI Number included
 - Warrant Deletion
 - Warrant Modification
 - Sex Offender Registry Entry
 - Sex Offender Registry Deletion
 - Sex Offender Registry Modification
 - Death Notices
- No, we will allow our subscribers to choose any of the Triggering Events to receive as future Rap Back Activity Notifications
- Not certain

(d) Do you use Event-Based Subscription Management (i.e., multiple enrollment of the same subject into NGI) or Category-Based Subscription Management (i.e., single

enrollment into NGI with additional enrollments held at the state level), as described in the *NGI Rap Back Noncriminal Justice Policy and Implementation Guide*?

- Event-Based Subscription Management
- Category-Based Subscription Management
- Both Event- and Category-Based Subscription Management
- Uncertain

ADDITIONAL COMMENTS:
