

Big Bend Conservation Area Land and Water Approval

Motion 09-002

The Steering Committee approved by consensus Reclamation entering into a long-term lease with Southern Nevada Water Authority (SNWA) for \$872,000 to secure 15 acres of land which are an in-holding within Big Bend State Park. The Steering Committee also directs Reclamation to add language to the Land Use Agreement stipulating that if the LCR MSCP permits are renewed at the completion of the Program that all parties agree to extend the Land Use Agreement for the new time period at no additional cost to the program beyond continuing land management costs. Program Decision Document 09-002 provides supporting documentation (moved by Bill Werner, seconded by Jon Sjoberg).
