

Resolution 11-001

Work Task E31: Hunter's Hole

October 27, 2010

Whereas, the LCR MSCP has been participating with numerous parties including the Yuma Crossing National Heritage to evaluate the restoration and maintenance of habitat at Hunter's Hole;

Whereas, a decision document (PDD 11-001) has been prepared which anticipates that the Hunter's Hole will provide at least 50 acres of cottonwood-willow land cover type within Reach 7;

Whereas, additional acreage may be incorporated into the Hunter's Hole in the future and additional covered species habitat may be developed through the adaptive management at the site;

Whereas the Program Manager is recommending that the Hunter's Hole be included within the LCR MSCP; now, therefore, be it

Resolved that the Steering Committee concurs with the recommendation to include the Hunter's Hole into the Lower Colorado River Multi-Species Conservation Program

Draft Motion

Move that LCR MSCP Steering Committee concur with the recommendation to include Hunter's Hole as a Conservation Area of the LCR MSCP and add Work Task E31: Hunter's Hole to the FY11 Program.
