TO: [REDACTED]
Assistant Director for Detention Management

FROM: [REDACTED]
Lead Compliance Inspector
The Nakamoto Group, Inc.

SUBJECT: **Annual Detention Inspection of the Webb County Detention Center**

The Nakamoto Group, Inc. performed an annual inspection for compliance with the ICE Performance-Based National Detention Standards (PBNDS) 2011 of the Webb County Detention Center in Laredo, Texas during the period of February 4-6, 2020. This is an IGSA facility.

The inspection was performed under the guidance of [REDACTED], Lead Compliance Inspector. Team members were:

Subject Matter Field	Team Member
Safety	[REDACTED]
Security	[REDACTED]
Medical Care	[REDACTED]
Detainee Rights	[REDACTED]
Medical Care	[REDACTED]

Type of Inspection

This is a scheduled annual inspection which is performed to determine overall compliance with the ICE PBNDS 2011 for Over 72 hour facilities. The facility received a previous rating of Meets Standards during the February 2019 inspection.

Inspection Summary

The Webb County Detention Center is currently accredited by:

- The American Correctional Association (ACA) – Yes
- The National Commission on Correctional Health Care (NCCHC) - No
- The Joint Commission (TJC) - No
- Prison Rape Elimination Act (PREA) - Yes

The Nakamoto Group, Inc.

2019 Annual Inspection	
Meets Standards	41
Does Not Meet Standards	0
Repeat Finding	0
Not Applicable	1

2020 Annual Inspection	
Meets Standards	41
Does Not Meet Standards	0
Repeat Finding	0
Not Applicable	1

The inspection team found one (1) component deficiency in the following standard:

Personal Hygiene – 1

Facility Snapshot/Description

The Webb County Detention Center is owned and operated by CoreCivic (prison contractor). The facility is located on the outskirts of Laredo, Texas and borders the Rio Grande River, which forms part of the Mexico-United States border. The facility opened in 1998 [REDACTED]

[REDACTED] The one-story structure houses adult male and female ICE and U.S. Marshall detainees of all classification levels. [REDACTED]

The facility is a single-story building. The housing units and all support services are located inside the secure perimeter; the maintenance shed and armory are positioned outside the secure perimeter. The secure compound is encircled by a ten-foot chain link fence supplemented with razor ribbon and a progressive stun fence installed on the inside of the fence line. There is a perimeter road around the compound that is continuously patrolled by an armed officer in a vehicle. The entire perimeter is covered by monitored camera surveillance. The facility surveillance network consists of 140 cameras that also monitor all housing units, common areas and movement corridors. The exterior doors of the building are alarmed and controlled by central control officers. All detainee movement is escorted.

The facility consists of 42 separate general population housing units. ICE detainees may be housed in any of the housing units as long as the populations have compatible classification levels. All housing units are comprised of dormitory settings, which range in size from 3–24 beds. There are two special management units (SMU), which serve all populations; each unit contains ten one-bed cells. There were no ICE detainees confined in the SMU during the inspection. The health care unit does not contain infirmary care beds. All housing units are governed by an indirect supervision style of management. Housing unit/roving officers are assigned housing unit zones for their daily patrol and supervision.

Each housing unit is designed with a dayroom area consisting of one television, a telephone bank to accommodate unit capacity, one kiosk on which detainees can order commissary and check their account balance, submit a medical sick call slip or send requests to the case manager, the business office, intake or the mail room. Each dayroom is equipped with table/chair settings where detainees eat their meals, play games/cards, converse with one another and watch television programs.

General population detainees have access to daily outdoor recreation for at least one hour per day. The facility has three outdoor recreation yards; toilet facilities and drinking water are accessible to detainees using the outdoor recreation areas. SMU detainees in administrative segregation status are offered daily outdoor recreation for at least two hours a day. SMU detainees in disciplinary segregation status are offered one hour of outdoor recreation five days a week. SMU detainees are under constant monitored camera surveillance in their housing units and while using the outdoor recreation areas.

Of the three male ICE detainees housed at the facility during the inspection, two of them were confidentially interviewed by our bi-lingual security SME. The third ICE detainee was placed on suicide watch in the medical unit on the day of his arrival and continued on that status during the inspection; he was not interviewed. The two detainee interviews registered no substantive concerns regarding life/safety issues. They were satisfied with the interaction from facility staff and the treatment they receive from the officers. They were also satisfied with the access and responsiveness from visiting ICE/ERO personnel and facility staff when addressing their complaints, requests and grievances. There were no substantive concerns registered regarding access to medical services, meals served, clothing issued, laundry exchange schedules, telephone access, visitation procedures, cleanliness, their safety, access to recreation areas, conditions of confinement or the variety of program activities.

Overall, the team found the atmosphere in the facility to be calm with no obvious indicators of high stress. Facility staff was observed interacting with detainees, which appeared to be direct, responsive and satisfying to the detainees. Facility staff were professional in appearance and knowledgeable of the daily event schedule and emergency response protocols. Detainees spoke freely with the inspectors. Interaction between detainees and ICE/ERO staff was observed to be professional and normal. The atmosphere throughout the facility was relaxed, quiet and free of any concernment.

Overall sanitation throughout the facility was observed to be average.

Food service is provided by a contract with Trinity Services Group. Health care services are provided by CoreCivic employees and contract employees from the local community. Detainee telephone services are contracted with Talton Communications, Inc. All other services are provided by CoreCivic.

The facility does not charge co-pays for medical, mental health or dental care.

Areas of Concern/Significant Observations

There were no areas of concern or significant observations.

Recommended Rating and Justification

The Lead Compliance Inspector recommends that the facility receive a rating of Meets Standards. The facility complies with the ICE Performance-Based National Detention Standards (PBNS) 2011. No (0) standards were found Does Not Meet Standard and one (1) standard was Not Applicable (N/A). All remaining forty-one (41) standards were found to be in compliance.

LCI Assurance Statement

The findings of compliance and noncompliance are accurately and completely documented on the G-324A Inspection Form and are supported by documentation in the inspection file. An out brief was conducted at the facility and in addition to the entire Nakamoto Group, Inc. Inspection Team, the following were present:

- ICE Officials – [REDACTED]
