Nonprofit Charitable Organizations, 1986 and 1987

By Cecelia Hilgert and Susan J. Mahler*

The total revenue and total assets of organizations exempt under Internal Revenue Code section 501(c)(3), except private foundations and religious organizations, increased for 1986 and 1987. Total revenue rose 9 percent from 1985 to \$292.5 billion for 1986, and 6 percent from 1986 to \$310.8 billion for 1987. The organizations' program activities provided more than two-thirds of total revenue (\$211.9 billion) for 1987, while contributions, gifts, and grants provided 20 percent (\$61.7 billion). These proportions were approximately the same for 1986. Total expenses were \$263.5 billion for 1986 and \$288.7 billion for 1987. For 1986 and 1987, 84 percent of total expenses were attributable to costs of conducting programs.

BACKGROUND

Statistics of Income Studies

The statistics presented in this article are based on data from Form 990, Return for Organization Exempt from Income Tax, the annual information return filed by organizations with annual gross receipts of more than \$25,000 (Figure A). The statistics do not include private foundations, because they are required to file a separate return form, and they do not include religious organizations, because they are not required to file Form 990.

The Statistics of Income Division has conducted studies on nonprofit charitable organizations exempt under section 501(c)(3) for reporting years 1975, 1982, 1983, and 1985 through 1987. Data for 1985 and earlier years and highlights of the 1986 data have been published in the *Compendium of Studies of Tax-Exempt Organiza-tions, 1974-87,* and the *Statistics of Income Bulletin* [1]. Some of the data discussed in this article are based on previously unpublished statistical tabulations from the Statistics of Income Division.

Organizations and Activities

Organizations that are tax-exempt under Code section 501(c)(3) include, for the most part, those with purposes that are religious, charitable, educational, or scientific. Their activities are restricted in that they must be in furtherance of one or more of these exempt purposes. Examples of the types of organizations that meet this criteria are nonprofit universities and schools, hospitals, Girl Scout/Boy Scout programs, United Way campaigns, community performing-arts associations, and environmental support groups. These organizations must serve the public (as opposed to private) interests. Under the Code, these organizations may not distribute net earnings to a private shareholder or individual. In addition, these organizations are restricted in their activities to influence legislation, and cannot participate in any political campaign on behalf of or in opposition to any candidate for political office.

The Internal Revenue Code classifies nonprofit organizations into 25 subsections, some of which may receive tax-deductible donations under section 170. Those organizations exempt under section 501(c)(3) receive the largest part of tax-deductible donations and are the largest providers of philanthropic goods and services.

FINANCIAL CHARACTERISTICS

The assets of the nonprofit charitable organizations increased from \$423.5 billion for 1985 to \$489.2 billion for 1986 and to \$529.5 billion for 1987. These increases were 15 and 8 percent, respectively. Most of the assets (85 percent) for 1986 and 1987 were owned by organizations with holdings of \$10 million or more (Figure B). These organizations also received three-quarters of the total revenue (\$226.4 billion for 1986 and \$238.9 billion for 1987). Revenue and asset data for the largest 501(c)(3) organizations are presented in Figures C and D, respectively.

A total of 113,072 of the 376,688 nonprofit charitable organizations recognized by the Internal Revenue Service (IRS) filed returns for 1986 and 122,018 of the 400,394 organizations recognized by the IRS filed returns for 1987 [2]. The number of returns filed increased by 15 percent from 1985 to 1986 and by 8 percent from 1986 to 1987. Over two-thirds of the returns for 1986 and 1987 were filed by organizations with assets of less than \$500,000. The number of returns filed by organizations in this asset-size class increased by 8 percent between 1986 and 1987, and the number of returns filed by organizations with assets of \$50 million or more increased by 11 percent from 1986 to 1987. Organizations in this asset-size class, however, filed less than 2 percent of the total number of returns. (Detailed financial data are provided by asset-size class in Table 1 and by State in Table 2 [3].)

Revenue

Program service revenue, which is generated through programs operated by nonprofit charitable organizations in support of their tax-exempt purposes, continued to grow both as a total amount and as a percentage of total revenue. This revenue was \$187.9 billion for 1986 (64 percent of total revenue) and \$211.9 billion for 1987 (68 percent of total revenue). Program service revenue increased by 12 percent between 1985 and 1986 and by 13 percent between 1986 and 1987. Some examples of program service revenue include tuition and fees at educational institutions, hospital patient care charges (including Medicare-Medicaid payments), admission fees collected by museums or community performing-arts groups, YMCA/YWCA activity fees, and payments received for insurance and retirement coverage by selected pension and annuity funds.

As shown in Figure E, program service revenue comprised nearly three-quarters of the total revenue of organizations with assets of \$10 million or more. While program service revenue as a source of funding is less important to smaller organizations than contributions, it has increased as a percentage of total revenue over time. This increase reflects, in part, the need for nonprofit charitable organizations to raise additional funds through their own programs. For both 1986 and 1987, program service revenue represented 38 percent of total revenue of organizations with assets of less than \$1 million, in contrast to 33 percent for 1985.

Contributions, gifts and grants increased to \$61.7 billion for 1987 from \$60.1 billion for 1986, less than a 3-percent increase (Figure F). The leveling-off in these revenues may be due to the 8-percent decline from 1986 to 1987 in the portion of those contributions, gifts, grants and bequests that were received directly from the public. This may have resulted, at least in part, from changes in the tax code as part of the Tax Reform Act of 1986, which lowered marginal tax rates for corporations and individuals and eliminated the charitable deduction for individuals who do not itemize their deductions. Direct public support was 54 percent of total contributions for

1986 and 49 percent of contributions for 1987 (Figure F). However, direct public support represented 42 percent of total contributions to organizations with assets of less than \$1 million for 1986 and 43 percent for 1987, up from 30 percent for 1985.

Contributions represented approximately the same proportion, 20 percent, of total revenue for all organizations for both 1986 and 1987. Contributions represented a larger source of revenue for smaller organizations than larger ones. They accounted for one-half of total revenue for organizations with assets of less than \$1 million. By contrast, for organizations with assets between \$10 million and \$50 million, contributions represented 17 percent of total revenue, and for organizations with assets of

\$50,000,000 or more, contributions represented only 13 percent of total revenue.

Government grants increased from \$22.3 billion for 1986 to \$25.4 billion for 1987, which maintained the 1986 level as a proportion of total revenue. For both 1986 and 1987, these grants were 8 percent of total revenue, compared to 9 percent for 1985. Within the various asset-size classes, Government grants were 24 percent of total revenue for small organizations with assets of less than \$1 million. This was a decline from 25 percent of the total for 1986 and 35 percent of the total for 1985. For organizations with assets of \$10 million or more, Government grants represented 5 percent of total revenue for each of the 3 years -- 1985, 1986, and 1987.

3/ Estimates should be used with caution because of the small number of sample returns on which they are based.

4/ Includes also returns with zero assets or assets not reported.

Note: Detail may not add to total because of rounding.

Expenses

Expenses of nonprofit charitable organizations, including such items as salaries and wages, pension plan contributions and other employee benefits, interest, rents, supplies, and travel totaled \$263.5 billion for 1986 and \$288.7 billion for 1987. The expenses that were attributable to specific program activities represented 84 percent of total expenses for both years. For 1987, expenses related to program activities ranged from \$19.0 billion. representing 80 percent of total expenses for organizations with assets of less than \$1 million, to \$187.3 billion, representing 85 percent of the total expenses of organizations with assets of more than \$10 million. Within these program activities, salaries and wages represented 30 percent of total expenses for both 1986 and 1987, totaling \$79.9 billion and \$88.6 billion, respectively.

Management and general expenses, which support the overall organization rather than specific programs, were \$38.2 billion for 1986 and \$42.6 billion for 1987, accounting for 14 percent of total expenses for 1986 and 15 percent for 1987. Fundraising expenses and payments to affiliates together comprised only 1 percent of total expenses. Payments to affiliates are payments to organizations closely related to the reporting organization, such as support and dues payments by local chapters to their State and national agencies.

Organizations with assets of \$10 million or more accounted for more than three-quarters of all expenses, even though organizations with assets of less than \$500,000 filed 70 percent of the returns for both 1986 and 1987. Detailed data on expenses for 1987 are presented in Table 3.

Assets and Liabilities

Assets increased to \$489.2 billion for 1986 and to \$529.5 billion for 1987, representing yearly increases of 15 percent and 8 percent, respectively. Land, buildings, and equipment represented the major asset holdings of nonprofit charitable organizations. These assets were \$157.6 billion for 1986 and \$172.6 billion for 1987, representing one-third of total assets for each year. These holdings grew annually by 10 percent from 1985 to 1987. For organizations with assets of \$10,000,000 or more, land, buildings, and equipment represented nearly onethird of total holdings for both years. However, for organizations with assets of \$50 million or more, investments in securities were the largest single component, \$123.1 billion for 1987. These investments were 35 percent of the total assets of these organizations, which was less than the 37 percent that they had represented for 1986. For the smaller organizations -- those with assets of less than \$500,000 -- total assets rose by 12 percent, largely from an increase in cash and savings. Together, these two assets represented 42 percent of total assets for both years.

Mortgages and other notes payable were the largest single liability item, totaling \$85.7 billion for 1986 and \$96.4 billion for 1987. Organizations with assets of \$50 million or more accounted for approximately 60 percent of these totals for each year, and those with assets between \$10 million and \$50 million accounted for an additional 20 percent (\$18.5 billion and \$19.2 billion, respectively).

The balance sheet of a tax-exempt section 501(c)(3) organization does not have an owner's equity section; instead, earnings accrue to a net worth/fund balance. The net worth/fund balance total for nonprofit charitable organizations was \$278.3 billion for 1986 and \$297.7 billion for 1987, representing nearly three-fifths of total assets.

TYPES OF ORGANIZATIONS

Figures G, H, and I display information on the types of nonprofit charitable organizations that filed Form 990 for 1987. This information is based on responses to a question on the return identifying the reason that an organization was not classified as a private foundation [4].

Figure H shows that hospitals, educational institutions, and "publicly-supported organizations" were the major categories of nonprofit charities in terms of selected balance sheet and income statement items. Publicly-supported organizations are comprised of qualified organizations that are operated for purposes that are beneficial to the public interest and that receive support from a broad cross-section of the public. (Examples include the United Way, the YMCA's and YWCA's, and the American Heart Association. Other examples include community cultural organizations such as the Portland Repertory Theater, and community foundations such as the Cleveland Foundation [5].) Together, the assets of these three types of organizations totaled \$402.0 billion for 1987 and their revenue, \$281.1 billion. They represented 76 percent and 90 percent, respectively, of the totals for all the nonprofit charitable organizations. These percentages are up from 1986, when these three types of organizations had assets totaling \$363.8 billion and revenues, \$254.7 billion -- 74 percent and 87 percent, respectively, of the totals for all organizations.

Hospitals accounted for 46 percent of total revenue and 30 percent of total assets, but, just 5 percent of the number of returns filed and 6 percent of the contributions received. (Most of their revenue was program service revenue.) While publicly-supported organizations comprised 72 percent of the total returns, they accounted for only 27 percent of total revenue and 22 percent of asset holdings. Educational institutions accounted for only 9 percent of returns but ranked second in terms of assets and contributions received with 24 and 22 percent, respectively. Nonprofit Charitable Organizations, 1986 and 1987

Figure I.--Contributions Received, by Major Type of Recipient Nonprofit Charitable Organization, Reporting Year 1987 [All figures are estimates based on samples-money amounts are in millions of dollars]

The largest asset holdings for these three major types of organizations were in the form of land, buildings, and equipment, representing 40 percent of the total asset holdings for these groups. For hospitals, these assets represented 46 percent of total assets; for educational institutions, 40 percent; and for publicly-supported organizations, 33 percent. In contrast, another category of nonprofit charitable organization identified on Form 990 -one that supports other charitable organizations -- held 59 percent of total assets in investment securities and only 6 percent in land, buildings, and equipment. Among the largest of these organizations are the Common Fund for Nonprofit Organizations, the Teachers Insurance and Annuity Association, and the American Cancer Society. Investment securities for this group were a slightly smaller proportion of assets than for 1986 (64 percent), possibly as a result of the stock market decline in October 1987.

Program service revenue represented an increasing share of total revenue for all organizations. For hospitals, it represented mainly charges to patients and comprised 91 percent of hospital revenue for both 1986 and 1987. For educational institutions, it comprised 61 percent of total revenue for 1986 and 60 percent for 1987, an increase from 55 percent for 1985. For publicly-supported organizations, program service revenue represented 41 percent of total revenue for both 1986 and 1987, up from 36 percent for 1985. For this latter group, contributions showed a decline as a proportion of total revenue -- from one-half of total revenue for 1985 to 44 percent for 1986 and 45 percent for 1987. Despite this, publicly-supported organizations received three-fifths of total contributions. Government grants to these organizations, after dropping by 15 percent from 1985 to 1986, rose from \$14.2 billion for 1986 to \$16.3 billion for 1987.

Another category of nonprofit charitable organizations -- those engaged in medical research -- reported assets of \$1.6 billion for 1985, \$6.8 billion for 1986 and \$7.3 billion for 1987. The large increase from 1985 to 1986 was due to the inclusion of the Howard Hughes Medical Institute, whose nonprofit status was not affirmed by the IRS until 1986. It reported assets of \$5.2 billion for both 1986 and 1987, with revenues of \$269 million for 1986 and \$212 million for 1987.

SUMMARY

For 1986 and 1987, nonprofit charitable organizations continued to report growth in their financial statistics. Revenue increased to \$310.8 billion for 1987, up from \$292.5 billion for 1986, a gain of 6 percent; assets were \$529.5 billion for 1987, up from \$489.2 billion for 1986, an increase of 8 percent. Hospitals, as a group, led all other types of organizations in both revenues and assets. The number of returns filed by nonprofit charitable organizations was 122,018 for 1987 and 113,072 for 1986, up from 106,449 for 1985.

Program service revenue -- the fees received for the programs conducted in support of the purposes for which the tax exemptions were granted -- was \$187.9 billion for 1986 and \$211.9 billion for 1987, representing 64 percent of total revenue for 1986 and 68 percent for 1987. Contributions remained relatively steady for the 2 years, \$60.1 billion for 1986 and \$61.7 billion for 1987. This source of revenue accounted for one-half of the revenue for or-ganizations with asset holdings of less than \$1 million, and a smaller share for the larger organizations. Expenses were \$263.5 billion for 1986 and \$288.7 billion for 1987, of which 84 percent was in support of the organizations' program services.

DATA SOURCES AND LIMITATIONS

The statistics in this article are based on samples of Form 990, Return of Organization Exempt from Income Tax, filed by organizations classified under Internal Revenue Code section 501(c)(3) for 1986 and 1987. The samples included only those organizations with receipts in excess of \$25,000, the filing threshold. The samples did not include private foundations, which were required to file a separate return form. The 1986 sample included 8,731 returns, while the 1987 sample included 10,756 returns. The returns in the samples were unaudited.

The samples were stratified by the size of assets of the organizations. For both samples, all returns of organizations with assets of \$50 million or more were selected. For 1986, 26 percent of the returns of organizations with assets of between \$10 million and \$50 million were in the sample, while for 1987, 96 percent of the returns of this asset-size were included. Lower sampling rates were used in the smaller asset classes.

NOTES AND REFERENCES

 Data for previous years were published in the Compendium of Studies of Tax-Exempt Organizations, 1974-87, Internal Revenue Service, Statistics of Income, U.S. Government Printing Office, Washington 1991. For selected financial data for 1986, see Hilgert, Cecelia, "Nonprofit Charitable Organizations: Highlights of Tax Year 1986 Data," pp. 167-8. For 1985 data, see Hilgert, Cecelia, and Mahler, Susan J., "Nonprofit Charitable Organizations, 1985," *Statistics of Income Bulletin,* Fall 1989, Volume 9, Number 2, pp. 53-65.

- [2] The total number of tax-exempt organizations, including those not required to file Form 990, was obtained from the Internal Revenue Service Exempt Organizations Business Master File, Monthly Exempt Organizations Statistical Summary (unpublished).
- [3] In Table 2, data for Puerto Rico are included in "Foreign."
- [4] See Meckstroth, Alicia, and Riley, Margaret, "Private Foundation Returns, 1986 and 1987," *Statistics of Income Bulletin*, Spring 1991, Volume 10, Number 4.
- [5] Community foundations are organizations with broad based public support that file Forms 990, as opposed to private foundations which have a narrower source of funding and file Forms 990-PF.
