Acknowledgments

Many persons participated in the various activities of the 1997 Economic Census—Manufacturing and Mining. **Judy M. Dodds**, Assistant Chief for Census and Related Programs, was responsible for the overall planning and management of the Numerical List of Manufactured and Mineral Products.

The Economic Planning and Coordinating Division provided the computer processing procedures. **Shirin A. Ahmed,** Assistant Chief for Post-Collection Processing, was responsible for the interactive database review and correction system. **Dennis Shoemaker,** Chief, Post-Collection Census Processing Branch, assisted by **Brandy L.Yarbrough,** Section Chief, prepared the design and specifications. **Sheila M. Proudfoot** provided primary staff assistance.

Mendel D. Gayle, Chief, Forms, Publications, and Customer Services Branch, assisted by **Julius Smith Jr.**, **Baruti A. Taylor Sr.**, **Patrick A. Duck, Charles T. Lee Jr.**, and **Taylor C. Murph** performed coordination activities such as developing specifications, integrating activities with other divisions, and quality control.

The development and review of the product codes in the Manufacturing and Mining sectors was performed under the direction of Patricia L. Horning, Chief, Construction and Minerals Branch, assisted by M. Susan Bucci, Section Chief; Kenneth I. Hansen, Chief, Manufactured Durables Branch, assisted by Mike Brown, Renee Coley, Raphael Corrado, and Milbren Thomas, Section Chiefs; and Michael Zampogna, Chief, Manufactured Nondurables Branch, assisted by Allen Foreman, Robert Miller, Robert Reinard, and Nat Shelton, Section Chiefs. Primary staff assistance was provided by Susan L. DiCola, Eva J. Snapp, Christopher D. Perrien, John F. Roehl, Jenifer Ambler, Brian Appert, Zoraida Arledge, Stanis Batton, Carol Beasley, Melissa Berry, Chris Blackburn, Larry Blumberg, Vera Harris-Bourne, Brenda Campbell, Suzanne Conard, Mary Ellickson, Matt Gaines, Kellie Garner, Merry Glascoe, Kay Hanks, Karen Harshbarger, Nancy Higgins, Walter Hunter, Jim Jamski, Evelyn Jordan, Paul Marck, Keith McKenzie, Philippe Morris, Joanna Nguyen, Betty Pannell, Joyce Pomeroy, Venita Powell, Nishea Quash, Cindy Ramsey, Chris Savage, Aronda Stovall, Sue Sundermann, Dora Thomas, Ann Truffa, Ronanne Vinson, Denneth Wallace, Richard Wiesler, Kristin Williams, Lissene Witt, and Mike Yamaner.

The staff of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and printing planning and procurement for the publication. **Cynthia G. Brooks** provided publication coordination and editing.

Introduction

PURPOSE

This numerical list includes the principal products and services of the manufacturing and mining industries in the United States. The data for these products and services were collected in the 1997 Economic Census - Manufacturing on 218 long forms (MC-2001 through MC-3912) and 30 short forms (MC-2071 through MC 3975) and in the 1997 Economic Census - Mining on 10 long forms (MC-1001 through MC-1403) and 2 short forms (MC-1371 and MC-1471). Each report covers one industry or more and includes a product inquiry which lists the primary products of the industries as well as the chief secondary products frequently reported by establishments classified in the industries on the form.

For the 1997 census, products were collected on the old Standard Industrial Classification (SIC) System code structure but will be published on the new North American Industrial Classification System (NAICS) code structure. Products and services were arrayed on the questionnaires generally in ascending seven-digit (product code) numerical order. The collected industry and product data will be recoded and published in the NAICS structure.

There are approximately 10,000 products (ten-digit codes) for which information is published in the manufacturing and mining sectors. Approximately 3,700 of these products are collected in the Census Bureau's Current Industrial Reports (CIR) program. Where CIR product detail is available, the census questionnaire requests only broad aggregates that can be "tied in" with the product detail in the CIR program. The new system contains about 1,500 manufacturing and mining product classes (seven-digit codes).

PRODUCT CODING SYSTEM

NAICS United States industries are identified by a six-digit code, in contrast to the four-digit SIC code. The longer code accommodates the large number of sectors and allows more flexibility in designing subsectors. Each product or service is assigned a ten-digit code. The product coding structure represents an extension, by the Bureau of the Census, of the six-digit industry classifications of the manufacturing and mining sectors. The classification system operates so that the industrial coverage is progressively narrower with the successive addition of digits. This is illustrated as follows:

NAICS level	NAICS code	Description
Sector	31-33	Manufacturing
Subsector	334	Computer and electronic product manufacturing
Industry group	3346	Manufacturing and reproduction of magnetic and optical media
Industry	33461	Manufacturing and reproduction of magnetic and optical media
U.S. Industry	334612	Reproduction of software
Product class	3346120	Prerecorded compact disc (except software), tape, and record reproducing
BLS link code Product code	3346120X 3346120XXX	

COMPARABILITY BETWEEN 1997 AND 1992

This manual attempts to preserve the historical comparability between the 1997 and 1992 censuses for product classes and product codes in Appendixes E and F.

Appendix E (1997 to 1992)

1997 published	1997 collected	1992 published
311211A	2041596 pt 2041596 pt	20415 2041591 2041592 2041595

The content of 1997 product class 311211A was collected on the 1997 questionnaire as product class 20415 and its content is the same as it was as published in 1992.

Product code 311211A171 was collected on the 1997 questionnaire as product 2041596 and its content is the sum of the products 2041591, 2041592, and 2041595 as shown in the 1992 publication.

Appendix F (1992 to 1997)

1992 published	1997 collected	1997 published

CURRENT INDUSTRIAL REPORTS

The 1997 Economic Census - Manufacturing, as in earlier censuses, utilizes the tieline relationship for reporting summary information in the census where product detail is being reported for the same period in a CIR or, in a few instances, surveys conducted by other Federal Government agencies. The product detail that is collected monthly, quarterly, or annually in the CIR is not duplicated in the economic census - manufacturing. Instead, a single (tieline) code is collected in the census that corresponds to the sum of the detail appearing if the CIR is used. The products collected in the CIR have been integrated into the main table with the census ten-digit product codes, however, a CIR survey flag has been placed beside the description which identifies the related CIR Report. Appendix B shows those CIR ten-digit product codes collected that are not integratable into the main table.

FORMAT OF MANUAL

The product code column, which includes codes used in the 1997 publications, is based on the NAICS structure. The ninth and tenth digits of the product code taken together are unique and identify the product. (Occasionally, the ninth digit will be similar for a group of related products within the same product class but the ninth digit by itself is not significant.)

These product and service codes are arrayed (generally) in ascending numerical order within their respective seven-digit product classes: the product classes within their six-digit U.S. industries; where applicable, six-digit U.S. industries within the respective five-digit industry grouping; and five-digit industry groupings within three-digit NAICS subsectors. NAICS subsectors, industry groupings, and U.S. industries are titled in accordance with the short NAICS titles shown in Part II. Numerical List of Short Titles. North American Industrial Classification System, 1997, first edition. Descriptions of product classes, eight-digit BLS link codes, and ten-digit products have been developed by the Bureau of the Census. The titles of the three- to seven-digit levels are shown in capital letters.

This manual contains six appendixes. Appendix A lists the Current Industrial Reports by survey name and title and shows the publication periods. Appendix B shows CIR Product Codes that were not integrated into the main table. Appendix C contains codes used on the census forms to collect miscellaneous detailed statistics data for selected nonmanufacturing and nonmining activities. Appendix D lists product class and product codes for products that are primary to more than one industry. Appendixes E and F illustrate the relationship between the 1997 and 1992, and the 1992 and 1997 product classes and product codes, respectively.
