

FLUORIDATION

Census

Third Annual Edition
1966

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
Division of Dental Health • Public Health Service
Washington, D.C. 20201

PREFACE

This publication provides information on the status of fluoridation in the United States by presenting national and State statistics on those populations consuming fluoridated public water supplies, as of December 31, 1965. Included are statistics which show increases, over the last 20 years, in the number and distribution of communities and their populations using fluoridated water. Some summary figures on the type of fluoride compounds used and source of authority to fluoridate are also shown.

This information is based on reports from the departments of health of each State. No community is listed nor its population included in the statistical summaries unless the Division of Dental Health, U.S. Public Health Service, has been officially notified by the appropriate State health department.
