[1]Unit of residence is defined as the individual urban place of 10,000 or more, or cities of 2,500 to 10,000 as a group, or the rural area of the county, of which the decedent was a resident. Urban places include every incorporated place having a population of 2,500 or more in 1950, as well as certain unincorporated places classified as "urban" under special rules. For further discussion of residence allocation rules, see text in Volume I, Vital Statistics of the United States, 1956.

[2]Includes estimate for Massachusetts; for explanation, see text in Volume I.

The category "nonmetropolitan counties" includes all other counties in the State.

NOTE.—The category "metropolitan counties" for a State includes all counties within the State that are in "standard metropolitan areas" as defined by the Bureau of the Census in 1950, except in New England where the counties are those in the "metropolitan State economic areas," also as defined by the Bureau of the Census in 1950. The category "nonmetropolitan counties" includes all other counties in the State.

NOTES:

The category "metropolitan counties" for a State includes all counties within the State that are in "standard metropolitan areas" as defined by the Bureau of the Census in 1950, except in New England where the counties are those in the "metropolitan State economic areas," also as defined by the Bureau of the Census in 1950. The category "nonmetropolitan counties" includes all other counties in the State.

Urban places of 10,000 or more listed in this table include incorporated places of 10,000 or more in 1950 and certain unincorporated areas classified as "urban" under special rules relating to population size and density. Areas classified as urban under these special rules are indicated by a footnote.
